Questions and Answers F. Kiefer, 2012-12-06 In almost all principled accounts of questions questions are related to the corresponding answers Zellig Harris Harris 1978 1 for example maintains that all interrogative sentences can be derived by means of the independently established transformations of the language from sentences which assert that someone is asking about a disjunction of statements which are the relevant possible answers to that interrogative This amounts to the claim that a yes no question such as Will John stay is derived from I ask you whether John will stay and a wh question such as Who came is derived from something like I ask you whether A came or B came or or X came Though in generative grammar interrogatives are not derived from the corresponding declaratives the semantic interpretation of questions is akin to the syntactic source of questions posited by Harris Jerrold J Katz and Paul M Postal Katz Postal 1964 113 117 state a reading rule for Q the interrogative constituent which boils down to 1 in the case of yes no questions and to 2 in the case of wh questions 1 Tell me which of the following is true John will stay or John will not stay 2 Tell me which of the following is true A came or B came or or X came Thus the semantic interpretation of questions makes reference to the set of possible answers
