examines how people learn from words and graphics and provides 15 evidence based principles for designing multimedia  
instruction      Science and ICT in the Primary School John Meadows, 2012-12-06 With a strong focus on helping children to  
learn the big ideas in science this book provides detailed and practical guidance on how to use ICT to support creative  
science teaching Emphasizing learning science through the technology rather than from it the book strikes a good balance  
between practical and academic dimensions through practical suggestions on how to plan schemes of work and lessons case  
studies that highlight how ICT can be incorporated into cross curricular themes of study examples of real science lessons  
advice on organizing learning in out of school settings Written with the standards for achieving qualified teacher status in  
mind this user friendly text is a vital resource for all students on initial teacher training courses and newly qualified teachers  
at primary level      Activity Theory in Formal and Informal Science Education Katerina Plakitsi, 2013-09-04 The purpose of  
this book is to establish a broader context for rethinking science learning and teaching by using cultural historical activity  
theoretic approach Activity theory already steps in its third generation and only a few works have been done on its  
applications to science education especially in Europe The context takes into account more recent developments in activity  
theory applications in US Canada Australia and Europe The chapters articulate new ways of thinking about learning and  
teaching science i e new theoretical perspectives and some case studies of teaching important scientific topics in for  
compulsory education The ultimate purpose of each chapter and the collective book as a whole is to prepare the ground upon  
which a new pedagogy in science education can be emerged to provide more encompassing theoretical frameworks that  
allow us to capture the complexity of science learning and teaching as it occurs in and out of schools The book captures the  
dialogic and interactive nature of the transferring the activity theory to both formal and informal science education It also  
contributes to the development of innovative curricula school science textbooks educational programs and ICT s materials As  
a whole the book moves theorizing and practicing of science education into new face and uncharted terrain It is  
recommended to new scholars and researchers as well as teachers researchers      **Spectrum** Wee Hong Chuen, 2002      □□
