Sutcliffe,2023-11-27 The task of language engineering is to develop the technology for building computer systems which can perform useful linguistic tasks such as machine assisted translation text retrieval message classification and document summarisation Such systems often require the use of a parser which can extract specific types of grammatical data from pre defined classes of input text There are many parsers already available for use in language engineering systems However many different linguistic formalisms and parsing algorithms are employed Grammatical coverage varies as does the nature of the syntactic information extracted Direct comparison between systems is difficult because each is likely to have been evaluated using different test criteria In this volume eight different parsers are applied to the same task that of analysing a set of sentences derived from software instruction manuals Each parser is presented in a separate chapter Evaluation of performance is carried out using a standard set of criteria with the results being presented in a set of tables which have the same format for each system Three additional chapters provide further analysis of the results as well as discussing possible approaches to the standardisation of parse tree data Five parse trees are provided for each system in an appendix allowing further direct comparison between systems by the reader The book will be of interest to students researchers and practitioners in the areas of computational linguistics computer science information retrieval language engineering linguistics and machine assisted translation **Handbook of Adhesion Technology** Lucas F. M. da Silva,Andreas Öchsner,Robert D. Adams,2011-06-10 Adhesives have been used for thousands of years but until 100 years ago the vast majority was from natural products such as bones skins fish milk and plants Since about 1900 adhesives based on synthetic polymers have been introduced and today there are many industrial uses of adhesives and sealants It is difficult to imagine a product in the home in industry in transportation or anywhere else

for that matter that does not use adhesives or sealants in some manner The Handbook of Adhesion Technology is intended to be the definitive reference in the field of adhesion Essential information is provided for all those concerned with the adhesion phenomenon Adhesion is a phenomenon of interest in diverse scientific disciplines and of importance in a wide range of technologies Therefore this handbook includes the background science physics chemistry and materials science engineering aspects of adhesion and industry specific applications It is arranged in a user friendly format with ten main sections theory of adhesion surface treatments adhesive and sealant materials testing of adhesive properties joint design durability manufacture quality control applications and emerging areas Each section contains about five chapters written by internationally renowned authors who are authorities in their fields This book is intended to be a reference for people needing a quick but authoritative description of topics in the field of adhesion and the practical use of adhesives and sealants Scientists and engineers of many different backgrounds who need to have an understanding of various aspects of adhesion technology will find it highly valuable These will include those working in research or design as well as others involved with marketing services Graduate students in materials processes and manufacturing will also want to consult it

The Poetry of Nature John T. Carpenter, Midori Oka, 2018-02-26 With a shared reverence for the arts of Japan T. Richard Fishbein and his wife Estelle P. Bender assembled an outstanding and diverse collection of paintings of the Edo period 1615-1868 The Poetry of Nature offers an in depth look at more than forty works from their collection that together trace the development of the major schools and movements of the era Rinpa Nanga Zen Maruyama Shij and Ukiyo e from their roots in Heian court culture and the Kano and Tosa artistic lineages that preceded them Insightful essays by John T. Carpenter and Midori Oka reveal a unifying theme the celebration of the natural world expressed in varied forms from the bold graphic manner of Rinpa to the muted sensitivity of Nanga Lavishly illustrated these works draw particular focus to the unique intertwinement of poetry and the pictorial arts that is fundamental to the Japanese tradition In addition to providing new readings and translations of Japanese and Chinese poems The Poetry of Nature sheds new light on the ways in which Edo artists used verse to transform their paintings into a hybrid literary and visual art
