Gariépy,2019-04-10 The Revolutionary Phenotype is a science book that brings us four billion years into the past when the first living molecules showed up on Planet Earth Unlike what was previously thought we learn that DNA based life did not emerge from random events in a primordial soup Indeed the first molecules of DNA were fabricated by a previous life form By describing the fascinating events referred to as Phenotypic Revolutions this book provides a dire warning to humanity if humans continue to play with their own genes we will be the next life form to fall to our own creation      **Life of Earth** Stanley A.
