Memes The Most Super Memes English Edition:

Hollywood Meme Iain Robert Smith, 2016-11-15 Acknowledgements Introduction 1 Tracing The Hollywood Meme Towards a Comparative Model of Transnational Adaptation 2 Hollywood and the Popular Cinema of Turkey 3 Hollywood and the Popular Cinema of the Philippines 4 Hollywood and the Popular Cinema of India Conclusion Bibliography Index **The Electric Meme** Robert Aunger, 2013-07-30 From biology to culture to the new new economy the buzzword on everyone's lips is meme How do animals learn things How does human culture evolve How does viral marketing work The answer to these disparate questions and even to what is the nature of thought itself is simply the meme For decades researchers have been convinced that memes were The Next Big Thing for the understanding of society and ourselves But no one has so far been able to define what they are Until now Here for the first time Robert Aunger outlines what a meme physically is how memes originated how they developed and how they have made our brains into their survival systems They are thoughts They are parasites They are in control A meme is a distinct pattern of electrical charges in a node in our brains that reproduces a thousand times faster than a bacterium Memes have found ways to leap from one brain to another A number of them are being replicated in your brain as you read this paragraph In 1976 the biologist Richard Dawkins suggested that all animals including humans are puppets and that genes hold the strings That is we are robots serving as life support for the genes that control us And all they want to do is replicate themselves But then we do lots of things that don't seem to help genes replicate We decide not to have children we waste our time doing dangerous things like mountain climbing or boring things like reading or stupid things like smoking that don't seem to help genes get copied into the next generation We do all sorts of cultural things for reasons that don't seem to have anything to do with genes Fashions in sports books clothes ideas politics lifestyles come and go and give our lives meaning so how can we be gene robots Dawkins recognized that something else was going on We communicate with one another and we get ideas and these ideas seem to have a life of their own Maybe there was something called memes that were like thought genes Maybe our bodies were gene robots and our minds were meme robots That would mean that what we think is not the result of our own creativity but rather the result of the evolutionary flow of memes as they wash through us What is the biological reality of an idea with a life of its own What is a thought gene It's a meme And no one before Robert Aunger has established what it physically must be This elegant paradigm shifting analysis identifies how memes replicate in our brains how they evolved and how they use artifacts like books and photographs and advertisements to get from one brain to another Destined to inflame arguments about free will open doors to new ways of sharing our thoughts and provide a revolutionary explanation of consciousness The Electric Meme will change the way each of us thinks about our minds our cultures and our daily choices **The Meme Machine** Susan Blackmore, 2000-03-16 Humans are extraordinary creatures with the unique ability among animals to imitate and so copy from one another ideas habits skills behaviours inventions songs and stories These are all memes a term first coined by

Richard Dawkins in 1976 in his book *The Selfish Gene* Memes like genes are replicators and this enthralling book is an investigation of whether this link between genes and memes can lead to important discoveries about the nature of the inner self Confronting the deepest questions about our inner selves with all our emotions memories beliefs and decisions Susan Blackmore makes a compelling case for the theory that the inner self is merely an illusion created by the memes for the sake of replication

Time's Up! Keith Farnish, 2009 From the Publisher People know that the climate is changing for the worse that species are being driven to extinction at a rapidly increasing rate and that entire ecosystems are becoming shadows of their former richness They know but they do not understand The global environmental crisis is closing in on humanity from all directions yet the crisis barely registers on this culture's list of problems As we stand around humanity is doomed to a collapse that may leave only a few nomads and a toxic barely survivable Earth in its wake So why is nothing being done beyond changing light bulbs recycling and buying organic food It's certainly not for a lack of good reasons Humans have no motivation stronger than survival yet the culture that dominates the culture we call industrial civilization has created a set of priorities that values financial wealth the possession of superfluous goods and short cheap thrills above that most basic need In short we are prepared to die in order to live a life that is killing us *Time's Up* is about changing our behavior The book describes how our actions affect the very things on Earth that we depend on for survival at scales that we rarely contemplate It arms us with the tools to free us from a culture that has blinded us for centuries and which will allow us to live in a way that will give Earth and ourselves a viable future
