Martian Gullies and their Earth Analogues S.J. Conway,J.L. Carrivick,P.A. Carling,T. de Haas,T.N. Harrison,2019-01-21 Gullies on Mars resemble

terrestrial gullies involved in the transport of abundant material down steep slopes by liquid water. However, liquid water should not be stable at the Martian surface. The articles in this volume present the two main opposing theories for Martian gully formation: climate-driven melting of surficial water ice deposits and seasonal dry ice sublimation. The evidence presented ranges from remote sensing observations to experimental simulations to comparison with Earth analogues. The opposing hypotheses imply either that Mars has been unusually wet in the last few million years or that it has remained a cold dry desert, both with profound implications for understanding the water budget of Mars and its habitability. The debate questions the limits of remote sensing data and how we interpret active processes on extra-terrestrial planetary surfaces even beyond those on Mars as summarized by the review paper at the beginning of the book.

Livable Streets 2.0 Bruce Appleyard, 2021-03-22 *Livable Streets 2.0* offers a thorough examination of the struggle between automobiles, residents, pedestrians, and other users of streets, along with evidence-based practical strategies for redesigning city street networks that support urban livability. In 1981, when Donald Appleyard's *Livable Streets* was published, it was globally recognized as a groundbreaking work, one of the most influential urban design books of its time. Unfortunately, he was killed a year later by a speeding drunk driver. This latest update, *Livable Streets 2.0*, revisited by his son Bruce, updates the topic with the latest research, new case studies, and best human-centered practices for creating more livable streets for all. It is essential reading for those who influence future directions in city and transportation planning, urban design, and community regeneration and placemaking. Incorporates the most current empirical research on urban transportation and land use practices that support the need for more livable communities. Includes recent case studies from around the world on successful projects, campaigns, programs, and other efforts. Contains new coverage of vulnerable populations.

Mexico International Monetary Fund. Western Hemisphere Dept., 2018-11-27 Mexico's economy has exhibited resilience in the face of a complex external environment. The current administration has responded appropriately to the recent external shocks and demonstrated its commitment to macroeconomic stability. The incoming administration is committed to maintaining very strong policies and policy frameworks going forward. Nevertheless, Mexico's strong trade and financial links to the global economy and, in particular, the United States, make it susceptible to changes in investor sentiment.

Sanctuary Cities, Communities, and Organizations Melvin Delgado, 2018-08-29 The term sanctuary city gained a new level of national recognition during the 2016 United States presidential election, and immigration policies and debates have remained a top issue since the election of Donald Trump. The battle over immigration and deportation will be waged on many fronts in the coming years, but sanctuary cities, municipalities that resist the national government's efforts to enforce immigration laws, are likely to be on the front lines for the immediate future, and social workers and others in the helping professions have vital roles to play. In this book, Melvin Delgado offers a compelling case for the centrality of sanctuary cities' cause to the very mission and professional identity of social workers and others in the human services and mental health professions. The text also presents a historical

perspective on the rise of the sanctuary movements of the 1970s and 2000s thereby giving context to the current environment and immigration debate Sanctuary Cities Communities and Organizations serves as a helpful resource for human service practitioners academics and the general public alike
