Research and Clinical Application Gerhard Litscher,2018-10-09 This book is a printed edition of the Special Issue Acupuncture Basic Research and Clinical Application that was published in Medicines **Signal Processing and Machine Learning for Biomedical Big Data** Ervin Sejdic,Tiago H. Falk,2018-07-04 Within the healthcare domain big data is defined as any high volume high diversity biological clinical environmental and lifestyle information collected from single individuals to large cohorts in relation to their health and wellness status at one or several time points Such data is crucial because within it lies vast amounts of invaluable information that could potentially change a patient s life opening doors to alternate therapies drugs and diagnostic tools Signal Processing and Machine Learning for Biomedical Big Data thus discusses modalities the numerous ways in which this data is captured via sensors and various sample rates and dimensionalities Capturing analyzing storing and visualizing such massive data has required new shifts in signal processing paradigms and new ways of combining signal processing with machine learning tools This book covers several of these aspects in two ways firstly through theoretical signal processing chapters where tools aimed at big data be it biomedical or otherwise are described and secondly through application driven chapters focusing on existing applications of signal processing and machine learning for big biomedical data This text aimed at the curious researcher working in the field as well as undergraduate and graduate students eager to learn how signal processing can help with big data analysis It is the hope of

Drs Sejdic and Falk that this book will bring together signal processing and machine learning researchers to unlock existing bottlenecks within the healthcare field thereby improving patient quality of life Provides an overview of recent state of the art signal processing and machine learning algorithms for biomedical big data including applications in the neuroimaging cardiac retinal genomic sleep patient outcome prediction critical care and rehabilitation domains Provides contributed chapters from world leaders in the fields of big data and signal processing covering topics such as data quality data compression statistical and graph signal processing techniques and deep learning and their applications within the biomedical sphere This book s material covers how expert domain knowledge can be used to advance signal processing and machine learning for biomedical big data applications Cooling Down Susanna M. Hoffman,Thomas Hylland Eriksen,Paulo Mendes,2022 Climate change is a slowly advancing crisis sweeping over the planet and affecting different habitats in

strikingly diverse ways While nations have signed treaties and implemented policies most actual climate change assessments adaptations and countermeasures take place at the local level People are responding by adjusting their practices livelihoods and cultures protesting and migrating This book portrays the diversity of explanations and remedies as expressed at the community level and its emphasis on the crucial importance of ethnographic detail in demonstrating how people in different parts of the world are scaling down the phenomenon of global warming **Handbook of Nature-Based Drought**

Solutions Saeid Eslamian,Faezeh Eslamian,2025-06-27 Handbook of Nature Based Drought Solutions covers the latest research on successful sustainable solutions for the efficient water resources management to overcome the drought and water scarcity problems The book centers around the realms of drought modeling green infrastructure planning and the utilization of remote sensing to evaluate dissect and oversee drought occurrences It delves into subjects such as risk mitigation strategic planning policy considerations and the ecological restoration of degraded lands after drought The use of case studies and novel methodologies including soft computing technique application will help the reader gain a deeper knowledge in understanding predicting and mitigating hydrometeorological hazards Offers fundamental information on nature based techniques to drought management Includes case studies and methods for the successful implementation of ecological restoration of degraded lands Covers both traditional and novel techniques for the efficient water resources management to overcome drought and water scarcity problems **Water Management in New Zealand's Canterbury**

Region Bryan R. Jenkins,2018-01-06 The book is designed to achieve two major purposes The first is to describe the developments in water management policy in the Canterbury Region of New Zealand The strategic approach the collaborative engagement and the nested adaptive systems approach represent a paradigm shift in water management in New Zealand The second is to delineate the sustainability framework that underpins the Canterbury approach The framework is based on the concept of developing sustainability strategies to address critical failure pathways While the focus of the book is on Canterbury comparative applications of the framework to issues in other parts of New Zealand and

international issues are proposed The book can be used in at least two ways The first is the application of a sustainability framework to the management of water in Canterbury region The second is the exposition of a sustainability framework that can be applied to the management of water in a region with the application to Canterbury as an illustrative case study
