**Assessment in Geographical Education: An International Perspective** Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

 remains popular within the geosciences and environmental science More specifically the volume conveys a growing legacy of  
 field based learning for young geomorphologists that can be used as a student book for field based university courses and  
 postgraduate research requiring fieldwork or field schools The editors have much experience of field based learning within  
 geomorphology and extend this to physical geography The topics covered are relevant to basic geomorphology as well as  
 applied approaches in environmental and cultural geomorphology The book integrates a physical human approach to  
 geography but focuses on physical geography and geomorphology from an integrated field based geoscience perspective  
 Addresses fluvial and karst landscapes in depth Focuses on field based learning as well as educational geomorphology  
 Conveys experiential knowledge in international contexts **How to Lead it: Primary Geography** Emma  
 Lennard, 2025-09-11 Finding it hard to know what to prioritise as subject lead or how to work out which research is relevant  
 and how it applies to your subject The How to Lead It series are the go to guides for primary subject leads in schools and  
 trusts In them you will find clear summaries of relevant research and thinking around best practice age specific and inclusive  
 classroom examples case studies reflective questions suggestions for short PD sessions with colleagues Everything in the  
 book is applied thoughtfully to your specific subject area These books enable busy subject leaders to confidently make good  
 decisions for effective teaching and impactful curricula All the key elements of the primary geography curriculum are  
 explored including curriculum design assessment writing questioning fieldwork and map work as well as support on how to  
 approach research and a step by step guide to implementing changes in realistic and inclusive ways Key Geography New
