**Pablo Iván Azócar Fernández, Manfred  
Ferdinand Buchroithner**

## **Geography Mapwork 2013 Scope:**

**The Teaching of Geography** B. C. Wallis, 2013-09-12 Originally published in 1967 this book addresses the teaching of various kinds of geography to secondary school students *Big Ideas in Education* Dr Russell Grigg, 2016-06-02 *Big Ideas in Education* What Every Teacher Should Know by Dr Russell Grigg provides an accessible and easily understood introductory guide to the big ideas that really matter in education The teaching profession is saturated with ideas Unfortunately some of these are half baked or fundamentally flawed Dr Russell Grigg moves beyond the unhelpful supposed dichotomies that pervade current educational thinking child centred versus teacher centred traditional versus progressive Throughout the book readers are invited to question assumptions and popular rhetoric and reflect on their own experiences *Big Ideas in Education* aims to equip teachers with a good understanding of current thinking in a diverse fluid and dynamic field Each of the big ideas is discussed within the framework of four questions what is the big idea who is behind it why is it important and what can you do Big ideas are important distinctive empowering adaptable and simple to understand Dr Russell Grigg provides readers with a concise and reliable introduction to twelve such ideas which are at the core of educational practice The ideas chosen are general rather than subject specific in nature In turn they invite the reader to look at teaching in wider society address elements of learning which teachers actively promote raise questions about why how and what to teach and finally look at ways of improving the quality of education The twelve big ideas under discussion are 1 Education education goes beyond the school gates and is a lifelong experience 2 Childhood children need time and space to explore enjoy learning and develop as children rather than miniature adults 3 Knowledge knowledge is the foundation for learning 4 Skills learners need to develop a broad range of skills in real life relevant contexts 5 Dispositions effective learning depends upon cultivating positive dispositions 6 Ethics teachers conduct should be guided by a moral purpose 7 Instruction direct instruction is a tried and tested means of effective teaching 8 Curriculum the curriculum is all the learning and assessment activities in school both planned and unintentional that contribute to agreed educational goals 9 Feedback providing personalised accurate specific and timely feedback is one of the keys to improving learning 10 Reflective practice good teachers critically analyse their practice with a view to improving what they do 11 Research research has a central role to play in the professional development of teachers 12 Professional leadership effective school leadership operates at all levels and is about shared vision support and securing improvement An ideal book for busy teachers who need to be kept up to speed with the latest thinking in education this comprehensive guide provides the essential knowledge to keep you fully informed whether leading staff discussions submitting assignments or preparing for interviews Suitable for teachers in any setting from trainees and NQTs to more experienced practitioners looking to reflect on their practice the book will also appeal to school leaders and teacher training providers **International Handbook on Geographical Education** Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least

because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

#### **Paradigms in Cartography** Pablo Iván Azócar

Fernández, Manfred Ferdinand Buchroithner, 2013-08-04 In this book the main trends concepts and directions in cartography and mapping in modernism and post modernism are reviewed Philosophical and epistemological issues are analysed in cartography from positivist empiricist neo positivist and post structuralist stances In general in cartography technological aspects have been considered as well as theoretical issues The aim is to highlight the epistemological and philosophical viewpoint during the development of the discipline Some main philosophers who have been influential for contemporary thinking such as Immanuel Kant Ludwig Wittgenstein Karl Popper and Bertrand Russell are considered None of these philosophers wrote about cartography directly excepting Kant but their philosophies are related to cartography and mapping issues The book also analyses the concept of paradigm or paradigm shift coined by Thomas Kuhn who applied it to the history of science Different cartographic trends that have arisen since the second half of the twentieth century are analysed according to this important concept which is implicit inside the scientific or disciplinary communities Further the authors analyse the position of cartography in the context of the sciences and other disciplines adopting a positivistic point of view Additionally they review current trends in cartography and mapping in the context of information and communication technologies in a post modernistic or post structuralistic framework Thus since the 1980s and 1990s new mapping concepts have arisen which challenge the discipline s traditional map conceptions

#### **Introduction to Piaget** R.G.

Richmond, 2013-08-21 First published in 2006 Professor Jean Piaget is most widely known as a child psychologist nevertheless he is also a zoologist a mathematician and a philosopher but perhaps above all he is a genetic epistemologist This volume acts as introduction and outline facets of Jean Piaget s psychology
