Exploring the Nexus of Geoecology, Geography, Geoarchaeology and Geotourism: Advances and Applications for Sustainable Development in Environmental Sciences and Agroforestry Research Haroun Chenchouni, Ezzoura Errami, Fernando Rocha, Luisa Sabato, 2018-11-27 This edited volume is based on the best papers accepted for presentation during the 1st Springer Conference of the Arabian Journal of Geosciences CAJG 1 Tunisia 2018 The book is of interest to all researchers in the fields of Environmental Sciences Geoecology Agroforestry Geography Geoarchaeology and Geotourism The Mediterranean Basin Middle East and surrounding regions are ecologically unique due to large differences in climatic geographical and geological features which grant countries of these regions with significant socio economic potentials in terms of fertile agricultural lands rich natural resources and the existence of strategic resources such as crude oil and natural gas However the valuation of ecosystem functions goods and services of natural and cultural heritages and bioresources of these regions is still little known This volume offers an overview of the latest information and ideas on the physical environment of these regions assessment and monitoring of natural bioresources including flora and fauna and the use of cutting edge methods for the development of sustainable agricultural systems It gives also new socio economic insights on geotourism and archaeology Main topics include 1

Environmental Assessment and Monitoring of Agrisilvicultural Systems² Environmental Impacts and Restoration Ecology of Natural and Agricultural Habitats³ Investigations and Applications in Environmental Biotechnology⁴ Spatiotemporal Patterns of Marine Biodiversity and Terrestrial Paleobiodiversity⁵ Socio economics of Geotourism and Archaeology Parole and Beyond Ruth Armstrong, Ioan Durnescu, 2017-07-21 This book provides an assessment of contemporary international knowledge about the experiences of life after release from prison For over 100 years people leaving prison have been supervised by probation services but little has been written about how those who are supervised experience this process or how this process influences experiences post release Research suggests that the success or failure of supervision in terms of reoffending may be related to how it is experienced but little has been written about how supervision interacts with these experiences Despite this lack of grounded knowledge post prison supervision continues to grow internationally This book addresses issues relating to life after release through providing a vision of contemporary life after prison in different social and economic climates from those who are the subjects of this growing and changing form of penal power An engaging and timely study this book will be of particular interest to scholars of criminal justice and punishment Language Development and Social Integration of Students with English as an Additional Language Michael Evans, Claudia Schneider, Madeleine Arnot, Linda Fisher, Karen Forbes, Yongcan Liu, Oakleigh Welply, 2020-07-16 Given the current context of the experience of migration on schools in England and Europe and the competing policies and approaches to social integration in schools there is a need to understand the connection between language development and social integration as a basis for promoting appropriate policies and practices This volume explores the complex relationship between language education and the social integration of newcomer migrant children in England through an in depth analysis of case studies from schools in the East of England The authors set this evidence against the background of policy debates in the wider international setting including a critical discussion of assumptions underlying national narratives of mainstreaming and assimilation In the light of an absence of national guidelines for appropriate practice in schools the authors outline a model of inclusive pedagogy for English as an additional language EAL and a framework of home school communication to promote effective EAL parental engagement in schools *OECD Regional Development Studies The Geography of Firm Dynamics: Measuring Business Demography for Regional Development* OECD, 2017-12-05 The Geography of Firm Dynamics provides methods and data to measure and analyse the creation and destruction of businesses across OECD regions **The Geography of Mobility, Wellbeing and Development in China** Wenjie Wu, Yiming Wang, 2020-02-25 Big data is increasingly regarded as a new approach for understanding urban informatics and complex systems Today there is unprecedented data availability with detailed remote sensed data on the built environment and rich mineable web based sources in the form of social media web mapping information services and other sources of unstructured big data This book brings together a group of international contributors to consider the geographical implications of mobility wellbeing and development within and across Chinese

cities through location based big data perspectives The degree of urban sprawl productive density and vibrancy can be reflected from location based social media big data The challenge is to identify map and model these relationships to develop cities at different places in the urban hierarchical system that are more sustainable This edited book aims to tackle these issues through two inter related geographical scales inter city level and intra city level The text is designed for graduate courses in planning geography public policy and administration and for international researchers who are involved in urban and regional economics and economic geography *The Physical Geography of Mongolia* Batchuluun Yembuu,2021-05-04 This book gives the most detailed and comprehensive physico geographical overview of the very unique country of Mongolia The country offers diverse geographical features and natural landscapes combined with a long history This book offers integrated and systematical research on the geophysical characteristics of Mongolia with an academic orientation It provides the readers with general knowledge of the physical geography of Mongolia as well as new results of the latest research The volume consists of 11 chapters each written by field experts with contributions from scientific researchers from Mongolia The topics covered geological and geomorphological characteristics and processes landscapes and landforms climate and climate change hydrology glaciers and permafrost soils environmental changes biodiversity and many other aspects of physical geography in Mongolia The book appeals to researchers and students of geography and related fields and can serve as a guide for field trips to Mongolia or basic literature for research projects ICEL2015-10th International Conference on e-Learning Dr Carlton Watson,2015-06-12 These proceedings represent the work of researchers participating in the 10th International Conference on e Learning ICEL 2015 which is being hosted this year by the College of the Bahamas Nassau on the 25 26 June 2015 ICEL is a recognised event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings display their work in progress and discuss conceptual advances in the area of e Learning It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of e Learning available to them With an initial submission of 91 abstracts after the double blind peer review process there are 41 academic Research papers and 2 PhD papers Research papers published in these Conference Proceedings These papers come from some many different countries including Australia Belgium Brazil Canada China Germany Greece Hong Kong Malaysia Portugal Republic of Macedonia Romania Slovakia South Africa Sweden United Arab Emirates UK and the USA A selection of the best papers those agreed by a panel of reviewers and the editor will be published in a conference edition of EJEL the Electronic Journal of e Learning www.ejel.com These will be chosen for their quality of writing and relevance to the Journal s objective of publishing papers that offer new insights or practical help into the application e Learning Yearbook of International Organizations 2013-2014 (Volume 3) Union Of International Associations,Union of International Associations,2013-08-09 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed

Li, Chunye Lin, Hongyan Liu, Weidong Liu, Yihe Lü, Shilong Piao, Qiuhong Tang, Fulu Tao, Lide Tian, Xiaohua Tong, Cunde Xiao, Desheng Xue, Linsheng Yang, Linwang Yuan, Yuanming Zheng, Huiyi Zhu, Liping Zhu, 2016-07-28 In four chapters and an introduction this book systematically helps readers understand the development of the Geographical Sciences both in China and in the world during the past 30 years Through data analysis of methodologies including CiteSpace TDA qualitative analysis questionnaires data mining and mathematical statistics the book explains the evolution of research topics and their driving factors in the Geographical Sciences and its four branches namely Physical Geography Human Geography Geographical Information Science and Environmental Geography It also identifies the role of the Geographical Sciences in the analysis of strategic issues such as global change and terrestrial ecosystems terrestrial water cycle and water resources land change global cryosphere evolution and land surface processes on the Tibetan Plateau economic globalization and local responses regional sustainable development remote sensing modelling and parameter inversion spatial analysis and simulation and tempo spatial processes and modelling of environmental pollutants It then discusses research development and inadequacy of Chinese Geographical Sciences in the above mentioned topics as well as in the fields including Geomorphology and Quaternary environmental change Ecohydrology ecosystem services the urbanization process and mechanism medical and health geography international rivers and transboundary environment and resources detection and attribution of changes in land surface sensitive components and uncertainty of spatial information and spatial analysis It shows that the NSFC has driven the development in all these topics and fields In addition the book summarises trends of the Geographical Sciences in China and the research level in major countries of the world through an overview of geographical education in colleges and universities the analysis of publications citations and author networks of SCI SSCI and CSCD indexed articles and the description of Sino USA Sino UK and Sino German cooperation This book serves as an important reference to anyone interested in geographical sciences and related fields **Essential Graphical Techniques in**

Geography Swapan Kumar Maity, 2021-11-30 Representation of geographical data using graphs diagrams and mapping techniques is a key for geographers and for researchers in other disciplines to explore the nature of data the pattern of spatial and temporal variations and their relationships and formulation of principles to accurately understand and analyze features on or near the earth's surface These modes of representation also enable the development of spatial understanding and the capacity for technical and logical decision making The book depicts all types of graphs diagrams and maps explained in detail with numerous examples The emphasis is on their appropriate data structure the relevance of selecting the correct technique methods of their construction advantages and disadvantages of their use and applications of these techniques in analyzing and realizing the spatial pattern of various geographical features and phenomena This book is unique in that it reflects a perfect correlation between theoretical knowledge of geographical events and phenomena and their realistic implications with relevant examples using appropriate graphical methods The book serves as a valuable resource for

students researchers cartographers and decision makers to analyze and represent various geographical data for a better systematic and scientific understanding of the real world

Gaming and Geography Michael Morawski, Sebastian Wolff-Seidel, 2024-09-25 This book explores the uncharted territory where gaming and geography intersect in Gaming and Geography Education This book bridges the gap between video games and geography delving into the constructivist creative processes of game development gameplay and critical reflections on video games role in geographical discourses Through a multi perspective lens the book examines how video games can facilitate the exploration of geographic questions and act as catalysts for critical discourses Scholars shed light on the geographies presented in video games including their representations spatial images and policies By viewing video games as cultural and critical geography practices the authors enrich the political socio cultural and critical geographies associated with this medium A key argument of the book is that video games can foster systemic competence and networked thinking particularly in addressing complex socio ecological challenges like climate change and migration In contrast to traditional geography classes digital games provide valuable simulations of complex systems enhancing students understanding and skills The book also explores other possibilities such as digital field trips and language support to enhance the educational experience Gaming and Geography Education offers a compelling narrative that highlights the diverse roles video games can play in geographic education By exploring the intersection of gaming and geography this book deepens our understanding of this dynamic relationship and its impact on critical geographies within the realm of video games

The Power of Geographical Thinking Clare Brooks, Graham Butt, Mary Fargher, 2017-03-02 In this book geography educators from around the globe discuss their research into the power of geographical thinking and consider successful strategies to implement improve and advance geography education in research and practice It addresses key topics in geography education such as multicultural competence the role of teachers the geography curriculum spatial thinking geographic information systems geocapabilities and climate change At a global level the contributors and editors bring together the most advanced collection of research and discussion surrounding issues in geography education The book will be of interest to geography education researchers worldwide including academics at university and teachers in schools as well as professional geographers with an interest in education

Divided Cities Annika Björkdahl, Lisa Strömbom, 2015-02-08 Combining peace and conflict studies with public administration research Divided Cities critically investigates the roles of public administration and civil servants in resolving issues that are potentially conflictual in divided societies Zooming in on nine cities with very different legacies and democratic development Copenhagen Malm Toronto Belfast Mostar Cape Town Mitrovica Nicosia and Jerusalem the contributors analyze the tools strategies and understandings of conflict resolution that are available in different stages between conflict and stability Exploring how contested issues have been addressed by whom and to what effect this collection of essays examines how public institutions and citizens have interacted to agree on the best course of action for progress in their respective cities

Bifurcation Theory for Hexagonal Agglomeration in Economic Geography Kiyohiro Ikeda, Kazuo

Murota, 2013-11-08 This book contributes to an understanding of how bifurcation theory adapts to the analysis of economic geography. It is easily accessible not only to mathematicians and economists but also to upper level undergraduate and graduate students who are interested in nonlinear mathematics. The self organization of hexagonal agglomeration patterns of industrial regions was first predicted by the central place theory in economic geography based on investigations of southern Germany. The emergence of hexagonal agglomeration in economic geography models was envisaged by Krugman. In this book after a brief introduction of central place theory and new economic geography the missing link between them is discovered by elucidating the mechanism of the evolution of bifurcating hexagonal patterns. Pattern formation by such bifurcation is a well studied topic in nonlinear mathematics and group theoretic bifurcation analysis is a well developed theoretical tool. A finite hexagonal lattice is used to express uniformly distributed places and the symmetry of this lattice is expressed by a finite group. Several mathematical methodologies indispensable for tackling the present problem are gathered in a self contained manner. The existence of hexagonal distributions is verified by group theoretic bifurcation analysis first by applying the so called equivariant branching lemma and next by solving the bifurcation equation. This book offers a complete guide for the application of group theoretic bifurcation analysis to economic agglomeration on the hexagonal lattice. *Oceanographic and Marine Cross-Domain Data Management for Sustainable Development* Diviacco, Paolo, Leadbetter, Adam, Graves, Helen, 2016-09-23 This title is an IGI Global Core Reference for 2019 as it is one of the best selling reference books within the Environmental Agricultural and Physical Sciences subject area since 2016 covering real world solutions to the challenges in collecting and analyzing environmental data. Focusing on the various technological scientific semantic and semiotic perspectives of sustainability initiatives this resource has been contributed by over 75 industry leading researchers from countries including but not limited to the U S UK Italy and Belgium. *Oceanographic and Marine Cross Domain Data Management for Sustainable Development* is a pivotal resource for the latest research on the collection of environmental data for sustainability initiatives and the associated challenges with this data acquisition. Highlighting various technological scientific semantic and semiotic perspectives this book is ideally designed for researchers technology developers practitioners students and professionals in the field of environmental science and technology.
