

PHASE 2

Copy the document from Phase 1 to the Phase 2 folder. Rename the Phase 1 document to Phase 2.

8 Task 8 (refer to the assessment tool while working on all tasks)**1 hour****Create a questionnaire**

To collect data and information that you may not find in other sources or to support data or information from other sources, you need to ask people's opinions. To do this you will need to compile a questionnaire. Use your knowledge from Grade 10 to create questionnaire questions and compile the questionnaire. (your teacher will also provide guidance on creating the questionnaire).

- Use a Word document to design your questionnaire using controls for electronic forms (Legacy controls) or use Google Forms or MS Forms. (Note: It is easier to use the legacy tools or Google Forms/MS Forms to transfer information electronically to Excel).
- The questions in the questionnaire should help you to gather data/information from people, i.e. data/information not likely to be found in other sources, e.g. opinions or preferences.
- Remember that questions with only one answer or questions where people are able to choose an answer from a list are often easier to process.
 - Questionnaires are often easier to interpret when they have headings and clear instructions for users.
 - Group related questions together under appropriate headings.
 - Design the questionnaire to suit the way in which it will be administered, e.g. use content controls/form fields to enable respondents to complete them electronically and for you to easily save the data.
 - Make use of professional formatting.
 - You need at least **FIVE** questions, excluding biographical data (e.g. name, gender, age, address) of the respondent.
 - Remember that you need information that can be processed in a spreadsheet, e.g. MS Excel.

It is important that you include questions that will give you data (numbers, quantities, statistics, etc.) that you will be able to process in a spreadsheet afterwards. (Try to limit the questionnaire to ONE page but you may use TWO pages if you use a Google form/MS Form)

Examples of questions where the answers could be processed in a spreadsheet (to determine which area most people think would have the biggest impact):

- How often do you use products or services that are powered by artificial intelligence?
 - a. Rarely b. Occasionally c. Frequently d. Almost always
- On a scale of 1 to 10, how concerned are you about the ethical implications of artificial intelligence?
- Distribute the questionnaire to at least 20 people in your school to complete.
- If you have used Google or Microsoft forms, save the original questionnaire in PDF format in your PAT phase 2 folder after you have sent it out. Download the responses to your questionnaire as an Excel Spreadsheet and save it in the same folder. It serves as evidence that 20 responses were received.
