- Unlicensed RFID readers and tags using Intellitag 500-series UHF OEM products can be integrated for use in applications that require read ranges up to 7 meters (22.96 ft)

Intellitag 500 reader/ programmer board sets are offered for integration into radio frequency identification (RFID) solutions requiring read range, multitag sort, read/ write, and memory capacity not provided by older, less flexible proximity technology. The fixed reader/ programmer board set is designed as an option to the Intermec 2100 Universal Access Point (UAP), but it may be integrated into other microcontroller-based systems.

Readers can be programmed for read only or read/ write operation. A powerful anticollision algorithm allows up to 50 tags per second to be scanned, regardless of the number of tags in the read zone.

Intermec's Amtech Systems Division, with over a decade of success designing, producing, installing, and supporting RFID solutions worldwide, is developing a range of Intellitag 500 RFID inserts, tags, scanners, and programmer subsystems for availability beginning in 1999.

These products are available to Intermec systems integration partners in established transportation and security access RFID applications, as well as growing applications in supply chain management, retail operations, manufacturing, logistics, health care and many more.
