Manual Flash Vs Ttl:

Understanding Flash Photography Bryan Peterson, 2011-08-30 Flash is a necessary and immensely creative tool that dramatically increases the opportunities of any amateur photographer. However, many amateurs find flash intimidating and unsure of where to begin. Instead, they continue limiting themselves to shooting only available light. *Understanding Flash Photography* is a guide to off-camera flash helping free photographers from auto to get the images they want when natural light isn't enough. If you've been afraid to venture past natural light, here is the book that will finally help you explore the exciting possibilities of artificial light. Author Bryan Peterson starts by breaking down how flash works, then dispels the widely held myth that automatic TTL flash exposure is easier, explaining how to quickly master manual flash exposure to control the quality, shape, and direction of light. For the hundreds of thousands who found *Understanding Exposure* an exciting tool in moving past auto exposure in available light, *Understanding Flash Photography* is the essential companion to mastering the often-challenging exposure puzzle.

[Mastering Canon EOS Flash Photography, 2nd Edition](#) Nk Guy, 2016-03-18 In this updated second edition of the authoritative bestselling *Mastering Canon EOS Flash Photography*, photographer NK Guy brings the book fully up to date with coverage of all the newest Canon gear that has hit the market since the first edition published in 2010. This includes coverage of the radio-enabled Canon Speedlite 600EX RT and Canon Speedlite Transmitter ST-E3-RT, as well as the other Speedlites that have been released since the first edition's publication: Canon Speedlite 90EX, 270EX II, 320EX, and 600EX. And this is the first book to cover Canon's new affordable master unit, the Speedlite 430EX III RT. Flash, digital cameras, and flash technology have truly revolutionized photography in the 21st century. Originally seen simply as a practical way to illuminate dark scenes with portable light, flash today is used for a host of creative and nuanced applications, including supplementing daylight, designing complex scenes lit by multiple light sources, and simply creating beautiful, controllable light for portraiture. With LCD screens on DSLRs, the ability to get instant feedback on lighting setups is a great help in advancing one's lighting capabilities and encouraging experimentation. However, flash photography can still be a difficult artistic and technical challenge. It's simple to get that harsh deer-in-the-headlights look from built-in automatic flash.
