**Knowledge Systems and Translation** Helle V. Dam, Jan Engberg, Heidrun Gerzymisch-Arbogast, 2011-12-22 It is generally agreed that knowledge plays an important role in translation and interpreting and that it should therefore be of central concern to translation and interpreting studies However there is no general agreement about what is actually meant by the term knowledge in this context nor about in exactly what ways it is relevant Also present day translation and interpreting studies offer only a limited amount of research specifically dedicated to knowledge systematization and other knowledge related issues This book is one of the first to systematically and exclusively address the question of knowledge in translation and interpreting It is a collection of papers by leading scholars both from the field of translation and interpreting and from adjacent fields where knowledge also plays an important role such as linguistics and computer science The experts present a wide variety of conceptions of knowledge and a number of different approaches to the study of knowledge in translation and interpreting some of them draw on concepts such as scenes and frames mental spaces and semantic networks some discuss knowledge systems from an ontological point of view and some present more general concepts of knowledge in translation and interpreting Along the same lines some of the contributors deal mainly with theoretical and conceptual aspects others focus on methodological issues and again others report on empirical studies What brings them together however is their common focus on the interface between knowledge and translation interpreting and their main achievement is that by joining forces they manage to present to their readers a state of the art report which offers both a clearer delimitation of the concept of knowledge and a better understanding of its role in translation and interpreting

Choice A New York Times Notable Book of 2019 From a rising star at The New Yorker a deeply immersive chronicle of how the optimistic entrepreneurs of Silicon Valley set out to create a free and democratic internet and how the cynical propagandists of the alt right exploited that freedom to propel the extreme into the mainstream For several years Andrew Marantz a New Yorker staff writer has been embedded in two worlds The first is the world of social media entrepreneurs who acting out of na vete and reckless ambition upended all traditional means of receiving and transmitting information The second is the world of the people he calls the gate crashers the conspiracists white supremacists and nihilist trolls who have become experts at using social media to advance their corrosive agenda Antisocial ranges broadly from the first mass printed books to the trending hashtags of the present from secret gatherings of neo Fascists to the White House press briefing room and traces how the unthinkable becomes thinkable and then how it becomes reality Combining the keen narrative detail of Bill Buford s Among the Thugs and the sweep of George Packer s The Unwinding Antisocial reveals how the boundaries between technology media and politics have been erased resulting in a deeply broken informational landscape the landscape in which we all now live Marantz shows how alienated young people are led down the rabbit hole of online radicalization and how fringe ideas spread from anonymous corners of social media to cable TV to the President s Twitter feed Marantz also sits with the creators of social media as they start to reckon with the forces they ve unleashed Will they be able to solve the communication crisis they helped bring about or are their interventions too little too late
