Overcoming Barriers to Deployment of Plug-in Electric Vehicles National Research Council,Transportation Research Board,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Overcoming Barriers to Electric-Vehicle Deployment,2015-06-26 In the past few years interest in plug in electric vehicles PEVs has grown Advances in battery and other technologies new federal standards for carbon dioxide emissions and fuel economy state zero emission vehicle

requirements and the current administration's goal of putting millions of alternative fuel vehicles on the road have all highlighted PEVs as a transportation alternative. Consumers are also beginning to recognize the advantages of PEVs over conventional vehicles such as lower operating costs, smoother operation and better acceleration, the ability to fuel up at home and zero tailpipe emissions when the vehicle operates solely on its battery. There are, however, barriers to PEV deployment including the vehicle cost, the short all-electric driving range, the long battery charging time, uncertainties about battery life, the few choices of vehicle models and the need for a charging infrastructure to support PEVs. What should industry do to improve the performance of PEVs and make them more attractive to consumers?

At the request of Congress, *Overcoming Barriers to Deployment of Plug-in Electric Vehicles* identifies barriers to the introduction of electric vehicles and recommends ways to mitigate these barriers. This report examines the characteristics and capabilities of electric vehicle technologies such as cost, performance, range, safety and durability and assesses how these factors might create barriers to widespread deployment. *Overcoming Barriers to Deployment of Plug-in Electric Vehicles* provides an overview of the current status of PEVs and makes recommendations to spur the industry and increase the attractiveness of this promising technology for consumers. Through consideration of consumer behaviors, tax incentives, business models, incentive programs and infrastructure needs, this book studies the state of the industry and makes recommendations to further its development and acceptance.

Complexity, Security and Civil Society in East Asia Peter Hayes, Kiho Yi, 2015-06-22 *Complexity, Security and Civil Society in East Asia* offers the latest understanding of complex global problems in the region including nuclear weapons, urban insecurity, energy and climate change. Detailed case studies of China, North and South Korea and Japan demonstrate the importance of civil society and civic diplomacy in reaching shared solutions to these problems in East Asia and beyond. Each chapter describes regional civil society initiatives that tackle complex challenges to East Asia's security. In doing so, the book identifies key pressure points at which civil society can push for constructive changes, especially ones that reduce the North Korean threat to its neighbors. Unusually, this book is both theoretical and practical. *Complexity, Security and Civil Society in East Asia* presents strategies that can be led by civil society and negotiated by its diplomats to realize peace, security and sustainability worldwide. It shows that networked civic diplomacy offers solutions to these urgent issues that official complex diplomacy cannot. By providing a new theoretical framework based on empirical observation, this volume is a must-read for diplomats, scholars, students, journalists, activists and individual readers seeking insight into how to solve the crucial issues of our time.

Patriotic Ayatollahs Caroleen Marji Sayej, 2018-04-15 *Patriotic Ayatollahs* explores the contributions of senior clerics in state and nation building after the 2003 Iraq war. Caroleen Sayej suggests that the four so-called Grand Ayatollahs, the highest ranking clerics of Iraqi Shiism, took on a new and unexpected political role after the fall of Saddam Hussein. Drawing on previously unexamined Arabic language fatwas, speeches and communiqués of Iraq's four grand ayatollahs, this book analyzes how their new pronouncements and narratives shaped public debates after 2003. Sayej

argues that contrary to standard narratives about religious actors the Grand Ayatollahs were among the most progressive voices in the new Iraqi nation She traces the transformative position of Ayatollah Sistani as the guardian of democracy after 2003 Sistani was in particular instrumental in derailing American plans that would have excluded Iraqis from the state building process a remarkable story in which an octogenarian cleric takes on the United States over the meaning of democracy Patriotic Ayatollahs counter conventional argument about the ayatollahs vision of a nonsectarian nation is neatly realized Through her deep knowledge and long term engagement with Iraqi politics Sayej advances our understanding of how the post Saddam Iraqi nation was built
