South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of

inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Coalition of the unWilling and unAble John R Deni, 2021-01-12 Why does the United States need European allies and why is it getting more difficult for those allies to partner with Washington in standing up to China pushing back against Russia and pursuing other common interests around the world This book addresses the economic demographic political and military trends that are fundamentally upending the ability and willingness of European allies to work with Washington Brexit and its impact on Britain s economy and its military Germany s seemingly relentless economic and political rise France s continuing economic malaise Italy s aging population and its withdrawal from major overseas operations and Poland s demographic decline and single minded obsession with Russia will combine to make partnership with Washington nearly impossible In short the constellation of allies and partners the United States has relied on since 9 11 will look very different a decade from now How should Washington respond It doesn t hold all the cards but this book offers an array of practical recommendations for American leaders By leveraging these proposals U S policy makers can avoid the worst case scenarios and make the most of limited opportunities

Many different groundbreaking approaches to hybridity are contained in this Handbook which brings together a collection of empirical studies from an international body of scholars. The chapters analyse and theorise the position of hybrid organisations and have important implications for theory, practice and policy in a context of proliferating hybrid forms of organisation.

Law Mart Riaz Tejani, 2017-07-18 American law schools are in deep crisis. Enrollment is down, student loan debt is up and the profession's supply of high paying jobs is shrinking. Meanwhile thousands of graduates remain underemployed while the legal needs of low income communities go substantially unmet. Many blame overregulation and seek a free market to solve the problem but this has already been tested. Seizing on a deregulatory policy shift at the American Bar Association, private equity financiers established the first for-profit law schools in the early 2000s with the stated mission to increase access to justice by serving the underserved. Pursuing this mission at a feverish rate of growth they offered the promise of professional upward mobility through high tech simplified teaching and learning. In *Law Mart* a vivid ethnography of one such environment Riaz Tejani argues that the rise of for-profit law schools shows the limits of a market based solution to American access to justice. Building on theories in law, political economy and moral anthropology Tejani reveals how for-profit law schools marketed themselves directly to ethnic/racial and socioeconomic minority communities, relaxed admission standards, increased diversity, shook up established curricula and saw student success rates plummet. They contributed to a dramatic rise in U.S. law student debt burdens while charging premium tuition financed up front through federal loans. Over time if economic theories have so influenced legal scholarship what happens when they come to shape law school transactions, governance and oversight? For students promised professional citizenship by these institutions is there a need for protections that better uphold institutional quality and sustainability? Offering an unprecedented glimpse of this landscape *Law Mart* is a colorful foray into these essential questions.

Sonnenfeld, 2014-04-08 The idea of ecological modernisation originated in Western Europe in the 1980s gaining attention around the world by the late 1990s At the core of this social scientific and policy oriented approach is the view that contemporary societies have the capability of dealing with their environmental crises Experiences in some countries demonstrate that modern institutions can incorporate environmental interests into their daily routines Elsewhere economic and political interests dominate development trajectories and environmental deterioration continues challenging the premises of ecological modernisation This volume brings together research on ecological modernisation practices around
