Eavesdropping on the Emperor Peter Kornicki, 2021-12-01 When Japanese signals were decoded at Bletchley Park who translated them into English When Japanese soldiers were taken as prisoners of war who interrogated them When Japanese maps and plans were captured on the battlefield who deciphered them for Britain When Great Britain found itself at war with Japan in December 1941 there was a linguistic battle to be fought but Britain was hopelessly unprepared Eavesdropping on the Emperor traces the men and women with a talent for languages who were put on crash courses in Japanese and unfolds the history of their war Some were sent with their new skills to India others to Mauritius where there was a secret radio intercept station or to Australia where they worked with Australian and American codebreakers Translating the despatches of the Japanese ambassador in Berlin after his conversations with Hitler retrieving filthy but valuable documents from the battlefield in Burma monitoring Japanese airwaves to warn of air raids Britain depended on these forgotten war heroes The accuracy of their translations was a matter of life or death and they rose to the challenge Based on declassified archives and interviews with the few survivors this fascinating globe trotting book tells their stories **The End of Public Schools**

Hursh, 2015-10-16 The End of Public Schools analyzes the effect of foundations corporations and non governmental organizations on the rise of neoliberal principles in public education By first contextualizing the privatization of education within the context of a larger educational crisis and with particular emphasis on the Gates Foundation and influential state and national politicians it describes how specific policies that limit public control are advanced across all levels Informed by a thorough understanding of issues such as standardized testing teacher tenure and charter schools David Hursh provides a political and pedagogical critique of the current school reform movement as well details about the increasing resistance efforts on the part of parents teachers and the general public **The Scandalous Presidency of Barack Obama**

Matt Margolis, 2018-04-03 I m proud of the fact that we re probably the first administration in modern history that hasn t had a major scandal in the White House So President Barack Obama boldly declared before leaving office and numerous times since But is it true Not according to Matt Margolis bestselling co author of The Worst President in History The Legacy of Barack Obama Margolis lays out the details of literally dozens of Obama administration scandals that have been ignored

downplayed or covered up by the mainstream media From Fast and Furious to the illegal IRS targeting of conservative groups to the recent NSA spying outrage Margolis makes a powerful case that the Obama years represented nearly a decade of lawless and abusive governance While Obama and his allies attempt to spin the narrative that his presidency represented a time of pristine politics it s critically important that Americans understand the truth Barack Obama brought to Washington corrupt Chicago machine politics of cronyism and corporate payoffs combined with audacious Alinskyite tactics aimed at dividing Americans and destroying his opponents Obama s legacy will be discussed and debated for decades But in the early months after he left office more scandals have been uncovered most notably an illegal scheme of using the NSA to spy on his political opponents and the frightening decision to block the prosecution of Iranian backed terrorists Far from being a virtuous New Camelot the Obama administration abused its power like few others

Biocrisis Albert J. Mauroni,2022-04-08 This book examines the recent intersection of national security and public

health regarding biological threats to the U S populace and proposes improvements to the executive and legislative development of U S policy addressing biological threat mitigation Over the last 20 years the national security community has engaged with disease related issues that have traditionally been the scope of public health agencies The federal government s response has been to create a single national biodefense strategy which has been largely ineffective in improving conditions due to poor terminology a lack of leadership and a failure to assess government programs Applying a public policy framework Albert J Mauroni examines how the government addresses biological threats including disease prevention bioterrorism response military biodefense biosurety and agricultural biosecurity and food safety He proposes a new approach to countering biological threats arguing that lead agencies should focus on implementing discrete portfolios with annual assessments against clear and achievable objectives

Scientific and Technical Aerospace Reports ,1966 *Storm of Steel* Mary R. Habeck,2014-08-22 In this fascinating account of the battle tanks that saw combat in the European Theater of World War II Mary R Habeck traces the strategies developed between the wars for the use of armored vehicles in battle Only in Germany and the Soviet Union were truly original armor doctrines generally known as blitzkreig and deep battle fully implemented Storm of Steel relates how the German and Soviet armies formulated and chose to put into practice doctrines that were innovative for the time yet in many respects identical to one another As part of her extensive archival research in Russia Germany and Britain Habeck had access to a large number of formerly secret and top secret documents from several post Soviet archives This research informs her comparative approach as she looks at the roles of technology shared influences and assumptions about war in the formation of doctrine She also explores relations between the Germans and the Soviets to determine whether collaboration influenced the convergence of their armor doctrines

The Politics of Peace Petra Goedde,2019-01-10 During a television broadcast in 1959 US President Dwight D Eisenhower remarked that people in the long run are going to do more to promote peace than our governments Indeed I think that people want peace so much that one of these days our governments had better get out of the way and let them have it At that very moment international peace organizations were bypassing national governments to create alternative institutions for the promotion of world peace and mounting the first serious challenge to the state centered conduct of international relations This study explores the emerging politics of peace both as an ideal and as a pragmatic aspect of international relations during the early cold war It traces the myriad ways in which a broad spectrum of people involved in and affected by the cold war used altered and fought over a seemingly

universal concept These dynamic interactions involved three sets of global actors cold war states peace advocacy groups and anti colonial liberationists These transnational networks challenged and eventually undermined the cold war order They did so not just with reference to the United States the Soviet Union and Western Europe but also by addressing the violence of national liberation movements in the Third World As Petra Goedde shows in this work deterritorializing the cold war reveals the fractures that emerged within each cold war camp as activists both challenged their own governments over the right path toward global peace and challenged each other over the best strategy to achieve it The Politics of Peace demonstrates that the scientists journalists publishers feminists and religious leaders who drove the international discourse on peace after World War II laid the groundwork for the eventual political transformation of the Cold War

Reputation for Resolve

Danielle L. Lupton,2020-04-15 How do reputations form in international politics What influence do these reputations have on the conduct of international affairs In Reputation for Resolve Danielle L Lupton takes a new approach to answering these enduring and hotly debated questions by shifting the focus away from the reputations of countries and instead examining the reputations of individual leaders Lupton argues that new leaders establish personal reputations for resolve that are separate from the reputations of their predecessors and from the reputations of their states Using innovative survey experiments and in depth archival research she finds that leaders acquire personal reputations for resolve based on their foreign policy statements and behavior Reputation for Resolve shows that statements create expectations of how leaders will react to foreign policy crises in the future and that leaders who fail to meet expectations of resolute action face harsh reputational consequences Reputation for Resolve challenges the view that reputations do not matter in international politics In sharp contrast Lupton shows that the reputations for resolve of individual leaders influence the strategies statesmen pursue during diplomatic interactions and crises and she delineates specific steps policymakers can take to avoid developing reputations for irresolute action Lupton demonstrates that reputations for resolve do exist and can influence the conduct of international security Thus Reputation for Resolve reframes our understanding of the influence of leaders and their rhetoric on crisis bargaining and the role reputations play in international politics
