Failure Vicki E. Alger, 2016-07-01. A comprehensive account and frank assessment of federal involvement in education is long overdue. Education policy expert Vicki E. Alger remedies this deficiency with her book *Failure: The Federal Miseducation of America's Children*. As its title indicates, *Failure* makes no effort to sugar-coat its findings. Created in 1979 after a lobbying campaign that spanned generations, the Department of Education has failed to live up to its promises. Federal involvement, whether related to testing, funding, or academic curricula, has failed to abide by the Constitution's implication that education must remain the domain only of state and local governments and private institutions. Most of all, the central government's pervasive meddling in education has failed America's school children and their parents. Education policy has long been mired in controversies, often with opposing sides missing the mark. *Failure* helps us step back from the skirmish du jour and redirects our focus to the big picture, showing us what's gone wrong over the decades and the institutional causes of these failures. It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats. Concerned citizens of every stripe will benefit from *Failure's* history of federal education policy, its brutally honest report card for the Department of Education, its look at education systems across the globe, and its ambitious policy recommendations. *Failure* might even succeed in reframing the way the federal education establishment thinks about education policy.

Cohomology for Quantum Groups via the Geometry of the Nullcone Christopher P. Bendel,Daniel K. Nakano, Brian J. Parshal,Cornelius Pillen,2014-04-07 In general little is known about the representation theory of quantum groups resp algebraic groups when l resp p is smaller than the Coxeter number h of the underlying root system For example Lusztig's conjecture concerning the characters of the rational irreducible G modules stipulates that $p \geq h$ The main result in this paper provides a surprisingly uniform answer for the cohomology algebra $H^*(u, C)$ of the small quantum group

Operator-Valued Measures, Dilations, and the Theory of Frames Deguang Han, David R. Larson,Bai Liu,Rui Liu,2014-04-07 The authors develop elements of a general dilation theory for operator valued measures Hilbert space operator valued measures are closely related to bounded linear maps on abelian von Neumann algebras and some of their results include new dilation results for bounded linear maps that are not necessarily completely bounded and from domain algebras that are not necessarily abelian In the non cb case the dilation space often needs to be a Banach space They give applications to both the discrete and the continuous frame theory There are natural associations between the theory of frames including continuous frames and framings the theory of operator valued measures on sigma algebras of sets and the theory of continuous linear maps between algebras In this connection frame theory itself is identified with the special case in which the domain algebra for the maps is an abelian von Neumann algebra and the map is normal i e ultraweakly or weakly

Respect for Teachers Brian Ford, 2012-12-27 For over 30 years we have been in the midst of a paradox Following a questionable logic that sees education as a means to economic ends efforts to reform education have focused on keeping the US from slipping in international economic competition Relying on testing as a standard in the end we may have decreased our human potential and become less competitive Our system has gotten worse at its core in its philosophical tenets and in its ultimate effects by placing unwonted pressure on our youth and in stifling their creativity While this goes back decades *Respect for Teachers* takes its title from a phrase perhaps a codeword in President s 2011 State of the Union address and sits down to consider its implications Connecting attacks on teachers unions and schools and the misrepresentation of research to the promotion of new economic models in education it suggests that the Obama administration may be without quite realizing it setting the stage for rapid privatization of the public system As this endangers the egalitarian basis of democracy it also reminds us that schooling is big business many trillions of dollars world wide Joseph Schumpeter once said No bourgeoisie ever disliked war profits *Respect* operates under the premise that no bourgeoisie ever disliked the spoils of school reform either
