Mesoamerican Archaeology Lisa Overholtzer, 2021-03 In the seventeen years since the first edition of Mesoamerican Archaeology Method and Theory was published our goal of providing

theoretically sophisticated and data rich explorations of important topics for a non specialist reader written by the researchers themselves has proved successful When approached by Wiley Blackwell to edit a second edition the original coeditors Julia Hendon and Rosemary Joyce agreed that the chance to incorporate new research by an international array of scholars was not to be missed The first move was to add Lisa Overholtzer as editor The three of us approached some authors from the first edition who agreed to update or rewrite their chapters We then invited new contributors whose work reflects current research trends in Mesoamerican archaeology For this edition we purposefully included a chapter on bioarchaeology and three chapters that include the Colonial period in their discussions As with the first edition this book is intended to be useful for anyone teaching Mesoamerican archaeology whether as the sole subject of a course or as one case study among others in courses dealing with archaeology of the Americas complex societies or other topics We also expect that it will be of interest to any reader who wants a sample of contemporary research on the major time periods and societies that are the focus of Mesoamerican archaeology Because this book is a departure from other models for introductory texts it is appropriate for us to briefly explain what it is and is not and to suggest how we hope it might be incorporated into the classroom All three of us teach material from the field of Mesoamerican archaeology in basic introductory courses and more advanced offerings As active researchers who each have developed and led our own field projects we find ourselves struggling to provide students with a sense of the research process In particular we think it is important for students to see that changes in archaeological understanding or differences in opinion as illustrated by some of the essays included here are a constructive part of the research process They reflect the mechanisms through which our discipline debates explanations puts them to the test against existing and new data and gradually revises them Too often we find that students and people outside the academy interested in archaeology have the impression especially from media coverage that changes in interpretation result from violent rejection of earlier ideas represented as poorly conceived foolish or examples of bad work We do not think that representing archaeology as a kind of winner takes all contest is very true to the reality of the constant hard work only occasionally accompanied by moments of transformative insight that we experience as field researchers Nor does the metaphor of a contest accurately represent the way that new research builds on and acknowledges older ideas even in the process of modifying extending or disagreeing with those ideas

Political Strategies in Pre-Columbian Mesoamerica
Sarah Kurnick, Joanne Baron, 2016-03-21 Political authority contains an inherent contradiction Rulers must reinforce social inequality and bolster their own unique position at the top of the sociopolitical hierarchy yet simultaneously emphasize social similarities and the commonalities shared by all Political Strategies in Pre Columbian Mesoamerica explores the different and complex ways that those who exercised authority in the region confronted this contradiction New data from a variety of well known scholars in Mesoamerican archaeology reveal the creation perpetuation and contestation of politically authoritative relationships between rulers and subjects and between nobles and commoners The contributions span the geographic

breadth and temporal extent of pre Columbian Mesoamerica from Preclassic Oaxaca to the Classic Pet n region of Guatemala to the Postclassic Michoac n and the contributors weave together archaeological epigraphic and ethnohistoric data Grappling with the questions of how those exercising authority convince others to follow and why individuals often choose to recognize and comply with authority Political Strategies in Pre Columbian Mesoamerica discusses why the study of political authority is both timely and significant reviews how scholars have historically understood the operation of political authority and proposes a new analytical framework to understand how rulers rule Contributors include Sarah B Barber Joanne Baron Christopher S Beekman Jeffrey Brzezinski Bryce Davenport Charles Golden Takeshi Inomata Arthur A Joyce Sarah Kurnick Carlo J Lucido Simon Martin Tatsuya Murakami Helen Perlstein Pollard and V ctor Salazar Ch vez

Joyce,2022-07-15 Materializing Ritual Practices explores the deep history of ritual practice in Mexico and Central America and the ways interdisciplinary research can be coordinated to illuminate how rituals create destroy and transform social relations Ritual action produces sequences of creation destruction and transformation which involve a variety of materials that are active and agential The materialities of ritual may persist at temporal scales long beyond the lives of humans or be as ephemeral as spoken words music and scents In this book archaeologists and ethnographers including specialists in narrative music and ritual practice

explore the rhythms and materiality of rituals that accompany everyday actions like the construction of houses healing practices and religious festivals and that paced commemoration of rulers ancestor veneration and relations with spiritual beings in the past Connecting the kinds of observed material discursive practices that ethnographers witness to the sedimented practices from which archaeologists infer similar practices in the past Materializing Ritual Practices addresses how specific materialities encourage repetition in ritual actions and in other circumstances resist changes to ritual sequences The volume will be of interest to cultural anthropologists archaeologists and linguists with interests in Central America ritual materiality and time Contributors M Charlotte Arnauld Giovani Balam Caamal Isaac Barrientos Cedric Becquey Johann Begel Valeria Bellomia Juan Carillo Gonzalez Maire Chosson Julien Hiquet Katrina Kosyk Olivier Le Guen Maria Luisa Vasquez de Agredos Pascual Alessandro Lupo Philippe Nondedeo Julie Patrois Russel Sheptak Valentina Vapnarsky Francisca Zalaquett Rock

Digital Methods and Remote Sensing in Archaeology Maurizio Forte, Stefano Campana, 2017-02-10 This volume debuts the new scope of Remote Sensing which was first defined as the analysis of data collected by sensors that were not in physical contact with the objects under investigation using cameras scanners and radar systems operating from spaceborne or airborne platforms A wider characterization is now possible Remote Sensing can be any non destructive approach to viewing the buried and nominally invisible evidence of past activity Spaceborne and airborne sensors now supplemented by laser scanning are united using ground based geophysical instruments and undersea remote sensing as well as other non invasive techniques such as surface collection or field walking survey Now any method that enables observation of evidence on or beneath the surface of the earth without impact on the surviving stratigraphy is legitimately within the realm of Remote Sensing The new interfaces and senses engaged in Remote Sensing appear throughout the book On a philosophical level this is about the landscapes and built environments that reveal history through place and time It is about new perspectives the views of history possible with Remote Sensing and fostered in part by immersive interactive 3D and 4D environments discussed in this volume These perspectives are both the result and the implementation of technological cultural and epistemological advances in record keeping interpretation and conceptualization Methodology presented here builds on the current ease and speed in collecting data sets on the scale of the object site locality and landscape As this volume shows many disciplines surrounding archaeology and related cultural studies are currently involved in Remote Sensing and its relevance will only increase as the methodology expands

Freidel,Arlen F. Chase,Anne S. Dowd,Jerry Murdock,2017-08-08 E groups are not the fifth element but a group of structures in the temple complexes of Classic Maya City centers In this volume from distinguished researchers of the Classic period the E groups prove to be more than just records of the sun s passages through the years **Lord Eight Wind of Suchixtlan and the Heroes of Ancient Oaxaca** Robert Lloyd Williams,2010-01-01 In the pre Hispanic Mesoamerican world histories and collections of ritual knowledge were often presented in the form of painted and folded books now known as codices and the knowledge itself was encoded into pictographs Eight codices have survived from the Mixtec peoples of ancient Oaxaca Mexico a part of one of them the Codex Zouche Nuttall is the subject of this book As a group the Mixtec codices contain the longest detailed histories and royal genealogies known for any indigenous people in the western hemisphere The Codex Zouche Nuttall offers a unique window into how the Mixtecs themselves viewed their social and political cosmos without the bias of western European interpretation At the same time however the complex calendrical information recorded in the Zouche Nuttall has made it resistant to historical chronological analysis thereby rendering its narrative obscure In this pathfinding work Robert Lloyd Williams presents a methodology for reading the Codex Zouche Nuttall that unlocks its essentially linear historical chronology Recognizing that the codex is a combination of history in the European sense and the timelessness of myth in the Native American sense he brings to vivid life the history of Lord Eight Wind of Suchixtlan AD 935 1027 a ruler with the attributes of both man and deity as well as other heroic Oaxacan figures

Williams also provides context for the history of Lord Eight Wind through essays dealing with Mixtec ceremonial rites and social structure drawn from information in five surviving Mixtec codices
