It might be argued that the project's results are biased because the results are self-reported. The study used a variety of measures that were triangulated to test whether the results were biased. The results are consistent across all measures.

Abstract

These findings suggest that there are some important differences between the two studies.

THE FOLLOWING ARE THE NAMES OF THE STUDENTS WHO PARTICIPATED IN THE STUDY:

Following these two completed issues in English, there will be a discussion of the new data collection, and then a short presentation of the new data analysis. The presentation will be followed by a discussion of the new data analysis and a short presentation of the new data analysis.
