**Undergraduate manual of clinical cases in OBYG-EBOOK** N.HEPHZIBAH KIRUBAMANI,Nalini A.P Alexander,R Premalatha,2017-02-22 The aim of the book is to help students to understand the importance of history taking physical examination and its relevance in making a provisional diagnosis This book also deals with relevant investigations based on provisional diagnosis Presentation is kept very simple and concise This book deals with common clinical conditions and is designed in such a way as to help students to prepare for their clinical and practical exams This book deals with common clinical conditions and is designed in such a way as to help students to prepare for their clinical and practical exams Photos of clinical importance specimens instruments and USG are incorporated in this book Case discussions and key points in each cases will help students to understand the subject easily Frequently asked questions are also included after each chapter

Algorithms and Architectures for Parallel Processing Jaideep Vaidya,Jin Li,2018-12-07 The four volume set LNCS 11334 11337 constitutes the proceedings of the 18th International Conference on Algorithms and Architectures for Parallel Processing ICA3PP 2018 held in Guangzhou China in November 2018 The 141 full and 50 short papers presented were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on Distributed and Parallel Computing High Performance Computing Big Data and Information Processing Internet of Things and Cloud Computing and Security and Privacy in Computing Interactions between groundwater and human communities: Perspectives on the resources, environments, threats and sustainable development Yong Xiao,Venkatramanan Senapathi,Lichun Wang,Chengcheng Li,Haiyan Liu,2023-06-22 Tourism, Climate Change and Sustainability Maharaj Vijay Reddy,Keith Wilkes,2013 Other research dimensions discussed in the book are drawn from Brazil Hawaii England Australia and New Zealand Cooling Down Susanna Hoffman,Thomas Hylland Eriksen,Paulo Mendes,2022-02-11 Climate change is a slowly advancing crisis sweeping over the planet and affecting different habitats in strikingly diverse ways While nations have signed treaties and implemented policies most actual climate change assessments adaptations and countermeasures take place at the local level People are responding by adjusting their practices livelihoods and cultures protesting and migrating This book portrays the diversity of explanations and remedies as expressed at the community level and its emphasis on the crucial importance of ethnographic detail in demonstrating how people in different parts of the world are scaling down the phenomenon of global warming **Energy Research Abstracts** ,1980 Handbook of Nature-Based Drought Solutions Saeid Eslamian,Faezeh Eslamian,2025-06-27 Handbook of Nature Based Drought Solutions covers the latest research on successful sustainable solutions for the efficient water resources management to overcome the drought and water scarcity problems The book centers around the realms of drought modeling green infrastructure planning and the utilization of remote sensing to evaluate dissect and oversee drought occurrences It delves into subjects such as risk mitigation strategic planning policy considerations and the ecological restoration of degraded lands after drought The use of

case studies and novel methodologies including soft computing technique application will help the reader gain a deeper knowledge in understanding predicting and mitigating hydrometeorological hazards Offers fundamental information on nature based techniques to drought management Includes case studies and methods for the successful implementation of ecological restoration of degraded lands Covers both traditional and novel techniques for the efficient water resources management to overcome drought and water scarcity problems

**Global Climate Change and Coastal Tourism** Andrew L. Jones, Michael Phillips, 2017-11-29 Building upon the book *Disappearing Destinations* Jones and Phillips 2010 and its conclusion that promoted the need to recognize problems meet expectations and manage solutions *Global Climate Change and Coastal Tourism* explores current threats to and consequences of climate change on existing tourism coastal destinations Part 1 of the book provides a theoretical platform and addresses topics such as sustainability tourism impacts governance trade and innovation and how the media addresses climate change and tourism It also assesses management and policy options for the future sustainability of threatened tourism coastal destinations Part 2 presents case studies from all regions of the world Europe The Americas Asia Africa and Australasia which synthesise findings to make recommendations that can be used to promote strategies that ameliorate projected impacts of climate change on coastal tourism infrastructure and in turn promote the future sustainability of coastal tourism destinations This is a timely and informative text with appeal to researchers undergraduate and post graduate students of tourism management tourism planning sustainable tourism development and leisure management coastal tourism management environmental management planning geography coastal zone management or climate change studies

**Mass Spectrometry for the Analysis of Pesticide Residues and their Metabolites** Despina Tsipi, Helen Botitsi, Anastasios Economou, 2015-05-12 Provides an overview of the use of mass spectrometry MS for the analysis of pesticide residues and their metabolites Presents state of the art MS techniques for the identification of pesticides and their transformation products in food and environment Covers important advances in MS techniques including MS instrumentation and chromatographic separations e.g. UPLC HILIC comprehensive GCxGC and applications Illustrates the main sample preparation techniques SPE QuEChERS microextraction used in combination with MS for the analysis of pesticides Describes various established and new ionization techniques as well as the main MS platforms software tools and mass spectral libraries

**Water Management in New Zealand's Canterbury Region** Bryan R. Jenkins, 2018-01-06 The book is designed to achieve two major purposes The first is to describe the developments in water management policy in the Canterbury Region of New Zealand The strategic approach the collaborative engagement and the nested adaptive systems approach represent a paradigm shift in water management in New Zealand The second is to delineate the sustainability framework that underpins the Canterbury approach The framework is based on the concept of developing sustainability strategies to address critical failure pathways While the focus of the book is on Canterbury comparative applications of the framework to issues in other parts of New Zealand and international issues are proposed The

book can be used in at least two ways The first is the application of a sustainability framework to the management of water in Canterbury region The second is the exposition of a sustainability framework that can be applied to the management of water in a region with the application to Canterbury as an illustrative case study

**Manual of Clinical Paramedic Procedures**  
Pete Gregory,Ian Mursell,2015-06-01 I can enthusiastically recommend the Manual of Clinical Paramedic Procedures as the book that I wish had been available to me when I was studying to become a paramedic From the foreword by Professor Malcolm Woollard Chair College of Paramedics Professor in Pre hospital and Emergency Care Director Pre hospital Emergency Cardiovascular Care Applied Research Group Coventry University Clinical procedures are a fundamental aspect of care for practitioners working in pre hospital settings The Manual of Clinical Paramedic Procedures is written specifically to support the practice of paramedics ambulance technicians first responders and volunteer ambulance personnel It presents up to date evidence based expert knowledge enabling paramedics to deliver effective patient focused care This accessible handbook provides a comprehensive exploration of core competencies and skills looking at topics including Aseptic Technique Airway Management Assisted Ventilation Cardiopulmonary Resuscitation Defibrillation and External Cardiac Pacing Observations Pain Assessment Management Respiratory Therapy Spinal Management and Venepuncture Each chapter provides the relevant anatomy physiology evidence based rationales for each procedure and contraindications of use Key features The first UK text to explore clinical procedures for paramedics With further reading and illustrations throughout All procedures include the rationale for the action recommended Guides paramedics in the clinical application of evidence based procedures

**COVID-19 related olfactory dysfunction: Neuropsychiatric, psychological, and cognitive effects** Dalinda Isabel Sánchez-Vidaña,Benson Wui-Man Lau,Dongdong Qin,2023-11-27 Olfactory dysfunction also known as anosmia and

hyposmia is one of the most prevalent 80-90% symptoms reported by patients with COVID-19. Outside the context of COVID-19, chemosensory dysfunction has been associated with decreased quality of life, anxiety, depression, and cognitive impairment. In the setting of COVID-19, decreased sense of smell has been positively associated with mood disorders such as anxiety and depression. The short-term and long-term neuropsychiatric implications of the olfactory dysfunction related to COVID-19 are still largely unexplored. Investigation of the neuropsychiatric sequelae of olfactory dysfunction related to COVID-19 infection is particularly critical to characterize the pathological effects of COVID-19 on brain function and to develop strategies to improve patients' quality of life and mental wellbeing. In this Research Topic, Frontiers aims to highlight studies that investigate the neuropsychiatric, psychological, and cognitive consequences of COVID-19-related olfactory dysfunction, present current advances in the field, and anticipate health care needs for the development of therapeutic interventions.

Government Reports Annual Index, 1987      **Agriculture and Natural Resources**, 2018      *Neuro-motor control and feed-forward models of locomotion in humans* Marco Iosa, Nadia Dominici, Federica Tamburella, Leonardo Gizzi, 2015-07-29

Locomotion involves many different muscles and the need of controlling several degrees of freedom. Despite the Central Nervous System can finely control the contraction of individual muscles, emerging evidences indicate that strategies for the reduction of the complexity of movement and for compensating the sensorimotor delays may be adopted. Experimental evidences in animal and lately human model led to the concept of a central pattern generator (CPG) which suggests that circuitry within the distal part of CNS, i.e. spinal cord, can generate the basic locomotor patterns even in the absence of sensory information. Different studies pointed out the role of CPG in the control of locomotion as well as others investigated the neuroplasticity of CPG allowing for gait recovery after spinal cord lesion. Literature was also focused on muscle synergies, i.e. the combination of locomotor functional modules implemented in neuronal networks of the spinal cord, generating specific motor output by imposing a specific timing structure and appropriate weightings to muscle activations. Despite the great interest that this approach generated in the last years in the Scientific Community, large areas of investigations remain available for further improvement, e.g. the influence of afferent feedback and environmental constraints for both experimental and simulated models. However, also supraspinal structures are involved during locomotion and it has been shown that they are responsible for initiating and modifying the features of this basic rhythm for stabilising the upright walking and for coordinating movements in a dynamic changing environment. Furthermore, specific damages into spinal and supraspinal structures result in specific alterations of human locomotion as evident in subjects with brain injuries such as stroke, brain trauma, or people with cerebral palsy; in people with death of dopaminergic neurons in the substantia nigra due to Parkinson's disease; or in subjects with cerebellar dysfunctions such as patients with ataxia. The role of cerebellum during locomotion has been shown to be related to coordination and adaptation of movements. Cerebellum is the structure of CNS where are conceivably located the internal models that are neural representations miming meaningful aspects of our body such as input

output characteristics of sensorimotor system Internal model control has been shown to be at the basis of motor strategies for compensating delays or lacks in sensorimotor feedbacks and some aspects of locomotion need predictive internal control especially for improving gait dynamic stability for avoiding obstacles or when sensory feedback is altered or lacking Furthermore despite internal model concepts are widespread in neuroscience and neurocognitive science neurorehabilitation paid far too little attention to the potential role of internal model control on gait recovery Many important scientists have contributed to this Research Topic with original studies computational studies and review articles focused on neural circuits and internal models involved in the control of human locomotion aiming at understanding the role played in control of locomotion of different neural circuits located at brain cerebellum and spinal cord levels

*Re-Framing Urban Space* Im Sik Cho,Chye-Kiang Heng,Zdravko Trivic,2015-10-23 *Re framing Urban Space* Urban Design for Emerging Hybrid and High Density Conditions rethinks the role and meaning of urban spaces through current trends and challenges in urban development In emerging dense hybrid complex and dynamic urban conditions public urban space is not only a precious and contested commodity but also one of the key vehicles for achieving socially environmentally and economically sustainable urban living Past research has been predominantly focused on familiar models of urban space such as squares plazas streets parks and arcades without consistent and clear rules on what constitutes good urban space let alone what constitutes good urban space in high density context Through an innovative and integrative research framework *Re Framing Urban Space* guides the assessment planning design and re design of urban spaces at various stages of the decision making process facilitating an understanding of how enduring qualities are expressed and negotiated through design measures in high density urban environments This book explores over 50 best practice case studies of recent urban design projects in high density contexts including Singapore Beijing Tokyo New York and Rotterdam Visually compelling and insightful *Re Framing Urban Space* provides a comprehensive and accessible means to understand the critical properties that shape new urban spaces illustrating key design components and principles An invaluable guide to the stages of urban design planning policy and decision making this book is essential reading for urban design and planning professionals academics and students interested in public spaces within high density urban development

*Contemporary Issues in Australian Urban and Regional Planning* Julie Brunner,John Glasson,2015-05-15 *Contemporary Issues in Australian Urban and Regional Planning* looks at a wide range of planning issues in Australia from the city to the regional scale covering key topics in sustainable development and planning including economic social environmental and governance perspectives It also covers issues of climate change population and urbanization trends economic competitiveness and the Quadruple Bottom Line QBL Sustainability agenda The book is organized around three key elements Pressures and Principles of development and planning for sustainability Planning Practice and Processes focused on essential topics including cities regions rural areas and social and environmental issues and Future Processes and Prospects for planning practice and education covering the

fundamental issues of assessing sustainability managing risk effective participation and evolving approaches to planning education Contemporary Issues in Australian Urban and Regional Planning is an invaluable resource for students and practitioners of planning and related fields and provides a critical perspective on current issues in evolving natural and socio economic contexts in Australian planning      *A Directory of Computer Software Applications* ,1979      *A Directory of Computer Software Applications, Energy, 1977-1980* ,1980
