**The Residency Coordinator's Handbook** Dianna Otterstad, 2007

Residency coordinators juggle a multitude of tasks supporting residents through a complex educational process ensuring the program director has the tools and resources he or she needs and monitoring the program's compliance with ACGME standards. The list goes on and on. Unfortunately, new coordinators are not often given the resources they need to effectively perform these tasks. They are left on their own to navigate complicated standards, overcome scheduling challenges, and master documentation requirements. Failure to quickly learn and carry out these duties puts the program's accreditation at risk. And because standards and expectations are constantly changing, even the most experienced coordinators often find themselves searching for practical, easy-to-understand resources to guide them through day-to-day activities. Karin J. Berntsen, 2004-10-30. A nation watched in horror as 17-year-old Jessica Santillian died needlessly after a heart-lung transplant in 2003. She had been given organs with the wrong blood type. That error killed her. It is just one among tens of thousands of less publicized errors that

occur in U S hospitals each year Author Karin Berntsen a veteran of the hospital and health care industry takes us through the headlines and the events never publicized into hospital wards and surgical rooms to see how errors are made causing disability or death She gives graphic examples of actual events that illustrate the problems cited in a federal Institute of Medicine report showing medical errors in the hospital cause 44 000 to 98 000 deaths each year Those errors include medication mistakes wrong site or side surgery and botched transfusions Berntsen explains why these are not just human errors with one or two people responsible they are systems failures that require a major culture change to remedy And that change she argues may not come without action by the very people the medical system is designed to help patients She offers clear actions consumers can take to assure they are not on the receiving end of a medical error The book details over 200 tips for improving patient safety U S hospitals have countless stories of miraculous healing and recovery the greatest technology most advanced medicines and best research in the world On the other hand we have a system where medical errors bring more than 120 fatalities each day across the country in hospitals An airline crash causing that many deaths daily would paralyze that industry But because the deaths and harm are diluted across and deep within the silence of hospitals it is easier to be complacent There is says Berntsen an urgent need to pause and take inventory a need for clinicians and consumers to come together as partners for change

Securing the future financial sustainability of the NHS Great Britain: National Audit Office,2012-07-05 Although in 2011 12 there was a surplus of 2 1 billion across the NHS as a whole there is also some financial distress particularly in some hospital trusts In the long term achieving financially sustainable healthcare is likely to mean changes to how and where people access services and some local commissioners are already consulting on and developing plans to do this Currently some organisations have relied on additional financial support from within the NHS 10 NHS trusts 21 NHS foundation trusts and three Primary Care Trusts PCTs have reported a combined deficit of 356 million There are four foundation trusts and 17 NHS trusts which between 2006 07 and 2011 12 needed injections of working capital from the Department of Health totalling 1 billion The Department anticipates that NHS trusts and NHS foundation trusts are likely to need around 300 million more public dividend capital in 2012 13 51 per cent of PCTs reported concern about the financial sustainability of their healthcare providers Previously PCTs and Strategic Health Authorities SHAs have been able to support otherwise weak providers It is not yet clear whether clinical commissioning groups and the NHS Commissioning Board will agree to provide financial support to providers in this way The NAO concludes that it is hard to see how continuing to give financial support to organisations in difficulty will be a sustainable way of reconciling growing demand for healthcare with the size of efficiency gains required within the NHS
