Fire & Ice Carol A. Mullen, 2005 *Fire Ice* presents the educational inquiry process to school practitioners and aspiring leaders The context for this study is unusual because it addresses inquiry learning at both the master's and doctoral level and within group settings The picture that emerges illustrates ways for mentors to engage graduate students in learning writing and research through collaborative structures with an emphasis on learning communities as the primary vehicle for growth and success In the book graduate students have served as research participants focus group members and survey respondents in their dual role as peer mentor Because graduate education is being challenged to meet the changing needs of the twenty first century the influence of the professions on academic degrees has meant that students must develop as scholar practitioners instead of strictly intellectual academics Metaphorically the fire possibility desire and content and ice restraint structure and form of scholarly inquiry is

used as a literary device to capture what it might mean for students to perform inquiry **Fire and Ice** Vincent Hunt, 2014-10-06 When Hitler ordered the north of Nazi occupied Norway to be destroyed in a scorched earth retreat in 1944 everything of potential use to the Soviet enemy was destroyed Harbours bridges and towns were dynamited and every building torched Fifty thousand people were forcibly evacuated thousands more fled to hide in caves in sub zero temperatures High above the Arctic Circle the author crosses the region gathering scorched earth stories of refugees starving on remote islands fathers shot dead just days before the war ended grandparents driven mad by relentless bombing towns burned to the ground He explores what remains of the Lyngen Line mountain bunkers in the Norwegian Alps where the Allies feared a last stand by fanatical Nazis and where starved Soviet prisoners of war too weak to work were dumped in death camps some driven to cannibalism With extracts from the Nuremberg trials of the generals who devastated northern Norway and modern reflections on the mental scars that have passed down generations this is a journey into the heart of a brutal conflict set in a landscape of intense natural beauty **Fire and Ice** Carly Fall, He can start fires with his mind She is in danger from the Russian mob They will both learn trust should be earned not given Marine Ruben Velasquez has been tortured degraded and humiliated by the very government he vowed to serve While working on his boss quiet ranch the solitude brings him peace and relative happiness He has also learned to control the supernatural ability of starting fires with his mind Katherine McCoy a federal prosecutor in Washington D C is gearing up for the biggest case of her life to prosecute Russian mob boss Sergio Bogrov However when she is attacked before the start of the trial it becomes clear that her involvement in the litigation has put her in mortal danger Hoping to keep her safe her uncle enlists help to protect her and Katherine finds herself under the care of the seductive and secretive cowboy Ruben At first their vast differences has them at odds yet an intense attraction develops When a treachery is revealed their trust is put to the test as they strive to unravel who committed the betrayal and why *Resident Evil: Fire & Ice Issue #1* , **Fire and Ice** Jonathan Mingle, 2025-06-25 High in the Himalayan valley of Zaskar in northwest India sits a village as isolated as the legendary Shangri La Long fed by runoff from glaciers and lofty snowfields Kumik a settlement of thirty nine mud brick homes has survived and thrived in one of the world's most challenging settings for a thousand years But now its people confront an existential threat chronic crippling drought which leaves the village canal dry and threatens to end their ancient culture of farming and animal husbandry Fire and Ice weaves together the story of Kumik's inspiring response to this calamity with the story of black carbon Black carbon from inefficient fires the particulate residue that makes soot dark is the second largest contributor to global warming after carbon dioxide It is also a key ingredient of the air pollution that public health experts regard as humanity's greatest environmental health risk worldwide soot laden smoke from household hearth fires and outdoor sources combine to kill over seven million people around the world every year Jonathan Mingle describes the joys and struggles of daily life in the Zaskar Valley where villagers are buffeted by powerful environmental and economic forces while also

tracing black carbon's dark fingerprints outward from Kumik and around the world Mingle investigates its impacts on snow ice and water from Mt Everest to California and the silent health epidemic it fuels from New York to New Delhi Combining cultural history detailed reportage climate and energy science and dramatic storytelling *Fire and Ice* is a profound examination of the global challenges of averting climate chaos and lifting billions out of energy poverty and water scarcity Can Kumik's people come together to reinvent fire harness what remains of their life sustaining ice and reinvigorate their traditions of solidarity in time to save themselves Can the rest of us rise to the same challenge *Fire and Ice* connects these questions with the work of enterprising scientists engineers entrepreneurs and activists around the world in a narrative that combines mythology reason humor persistence and hope in a race against a global clock [Love between Fire and Ice](#)

Filmon,2013-04-26 This story is about a greedy king King Gotstohav and the townspeople who lived a very poor life because of his parties and affairs It is also about a boy named Damoan and his girlfriend Chateal who is confined to a wheelchair She takes a journey where she overcomes her confinement and helps the townsfolk by trusting a dragon named Bernie and an abominable snowman named Burricey to overthrow the king Its a journey for every child *Death by Fire and Ice* Brian O'Connor,2022-10-15 Death by Fire and Ice tells the little known story of the sinking of the steamboat Lexington on Long Island Sound in January 1840 Built in 1835 by Cornelius Vanderbilt the Lexington left Manhattan bound for Stonington Connecticut at four o clock in the afternoon on a bitterly cold day carrying an estimated one hundred forty seven passengers and crew and a cargo of among other things baled cotton After making her way up an ice encrusted East River and into Long Island Sound she caught fire off Eaton s Neck on Long Island s north shore at approximately seven o clock The fire quickly ignited the cotton stowed on board With the crew unable to extinguish the fire the blaze burned through the ship s wheel and tiller ropes rendering the ship unmanageable Soon after the engine died and the blazing ship drifted aimlessly in the Sound away from shore with the prevailing wind and current As the night wore on the temperature plummeted reaching nineteen degrees below zero With no hope of rescue on the dark horizon the forlorn passengers and crew faced a dreadful decision remain on board and perish in the searing flames or jump overboard and succumb within minutes to the Sound s icy waters By three o clock in the morning the grisly ordeal was over for all but one passenger and three members of the crew the only ones who survived The tragedy remains the worst maritime disaster in the history of Long Island Sound Within days the New York City Coroner convened an inquest to determine the cause of the disaster After two weeks of testimony reported daily in the New York City press the inquest jury concluded that the Lexington had been permitted to operate on the Sound at the imminent risk of the lives and property of its passengers and that had the crew acted appropriately the fire could have been extinguished and a large portion if not all of the passengers saved The public s reaction to the verdict was scathing the press charged that the members of the board of directors of the Transportation Company which had purchased the Lexington from Commodore

Vanderbilt in 1839 were guilty of murder and should be indicted Calls were immediately made for Congress to enact legislation to improve passenger safety on steamboats This book explores the ongoing debate in Congress during the nineteenth century over its power to regulate steamboat safety and it examines the balance Congress struck between the need to insulate the nation s shipping industry from ruinous liability for lost cargo while at the same time greatly enhancing passenger safety on the nation s steamboats Fire and Ice: Soot, Solidarity, and Survival on the Roof of the World

Jonathan Mingle,2015-03-24 A thousand years ago in a Himalayan valley the village of Kumik was founded For generations Kumik villagers survived by learning to cultivate their mountain terrain drawing from the waters of the glacier and snows above the village But now the glacier is almost gone and Kumik is dying Why As Fire and Ice reveals the culprit is black carbon the most dangerous pollutant in the world and the least understood Black carbon absorbs more heat per unit of mass in the atmosphere than greenhouse gases and contributes as much to melting the glaciers of the Himalaya as carbon dioxide It s also a major component of the household air pollution that causes 4.3 million deaths each year from respiratory and cardiovascular illnesses and 3 million more from outdoor pollutants such as industrial exhaust Black carbon threatens to overwhelm Kumik unless the village can change the way it cooks heats farms and lives In Fire and Ice Jonathan Mingle weaves a dramatic narrative of one village s inspiring efforts to adapt to a rapidly changing environment and a scientific detective tale about the impact of fire on every nation Ranging from the Tibetan Plateau to New York and Washington D C from Delhi and Kathmandu and China to northern California Fire and Ice is a heroic exploration of our race to change the fate of our planet By Fire and Ice David A. Koplow,2021-01-26 This book first published in 1997 examines the forced merger between national security interests and environmental policy makers arising from the Chemical Weapons Convention and its requirement to safely dismantle the world s chemical weapons stockpiles The two groups had to find a way to intersect and work together and this book analyses the problems and politics involved
