Installation on non-combustible floor shall be with factory supplied legs or casters. Counter models (IFST, IFPT) are for installation on a non-combustible counter with 4" legs.

It is also important not to obstruct the natural flow of combustion and ventilation air if the fryer is to operate properly. Provide adequate clearance around air openings into the combustion chamber.

RATING PLATE:

Before making any connections to the fryer, check the rating plate to be sure the fryer specifications concur with the type of gas to be supplied to the fryer. The rating plate is located on the body side.

Information on this plate includes model and serial numbers. When communicating with factory about a unit or requesting special parts or information, this data is essential for proper identification. Other information on this plate is the BTU/hr input of the burners, operating gas pressure in inches WC, and whether the unit is orificed for natural or propane gas. Pilot lighting instructions are also located in the same area.
