web key steps in solving exponential equations without logarithms so that if latex large b color blue m b color red n latex in other words if you can express the exponential equations to have the same base on both sides then it is okay to set their powers or exponents equal to each other

solving exponential equations using logarithms khan academy - Sep 04 2022

web the key to solving exponential equations lies in logarithms let s take a closer look by working through some examples solving exponential equations of the form  $a \cdot b^x = d$  let s solve  $5 \cdot 2^x = 240$  to solve for x we must first isolate the exponential part to do this divide both sides by 5 as shown below
