Journalism and the Political Felicitas Macgilchrist,2011-02-16 Journalism is often thought of as the fourth estate of democracy This book suggests that journalism plays a more radical role in politics and explores new ways of thinking about news media discourse It develops an approach to investigating both hegemonic discourse and discursive fissures inconsistencies and tensions By analysing international news coverage of post Soviet Russia including the Beslan hostage taking Gazprom Litvinenko and human rights issues it demonstrates the re production of the common sense social order in which one particular area of the world is more developed civilized and democratic than other areas However drawing on Laclau Mouffe and other post foundational thinkers it also suggests that journalism is precisely the site where the instability of this global social order becomes visible The book should be of interest to scholars of discourse analysis journalism and communication studies cultural studies and political science and to anyone interested in positive discourse analysis and practical counter discursive strategies *Documentary annex, report to Congress of the U.S.-China Security Review Commission* U.S.-China Security Review Commission,2002 *European Energy Markets Observatory (2010)* Colette Lewiner,2012-04-09 The twelfth edition of the European Energy Markets Observatory covers the full year 2009 and the winter 2009 2010 Key messages developed in the report include the following New energy trends are emerging after the crisis The crisis and some new investments resulted in an improved security of supply There has been little progress towards the creation of a single European energy market EU greenhouse gas emissions reduction objective will be met but renewables and energy efficiency targets are a challenge Generation mix and customers behavioral changes are calling for smart grids Utilities are focusing on reducing their debts [New Political Economy of Energy in Europe](#) Jakub M. Godzimirski,2018-09-21 This edited collection details and analyses the dramatic changes that the international political economy of energy has undergone in the past decade This change began with the increasing assertiveness of Russia when the oil price rose above the 100 mark in 2008 This combined with the rise of shale oil and gas made the USA all but self sufficient in terms of fossil fuels The collapse of the oil price in 2014 15 Saudi Arabia s new strategy of defending its market share and the increasingly tense and controversial relationship between the West and Russia all worked to further strengthen the geopolitical dimension of energy in Europe The global result is a world in which geopolitics play a bigger part than ever before the central question the authors of this volume grapple with is how the EU and European small states can deal with this Chapter 4 of this book is available open access under a CC BY 4 0 license at link.springer.com
