NeuroAuthority Brian Ainsley Horn, 2017-01-11 What is NeuroAuthority anyway At a high level it's the combination of neuroscience and authority marketing Neuromarketing is a new field of marketing research that studies consumers sensorimotor cognitive and affective response to marketing stimuli The technology is based on a model whereby the major thinking part of human activity over 90% including emotion takes place in the subconscious area that is below the levels of controlled awareness Authority marketing helps entrepreneurs leverage their knowledge to gain authority status in their industry This authority status then allows them to dramatically amplify their message and convert their new audience into higher paying customers In other words it's the process for positioning yourself as an authority or even a celebrity in your marketplace NeuroAuthority is the science of creating authority positioning in the subconscious area that is below the levels of controlled awareness It's using

the proven tools of neuroscience to determine why we deem one person as an expert over another and then applying the research so you can use it to get more clients Traditional methods used by marketers won't trigger decisions at a subconscious level They just use whatever the shiny button is at the moment and hope that it will work Instead they should use a scientific approach to capture insights that predict why prospects will choose to follow respect and eventually buy from one person over another In his latest book Best Selling Author and Entrepreneur Brian Ainsley Horn reveals the concept of NeuroAuthority and uses case studies to back up his findings He also provides actionable applications of it for entrepreneurs small business owners and professionals
