Googled The End Of The World As We Know It:

Googled Ken Auletta, 2010-10-26 The fullest account yet of the rise of one of the most profitable most powerful and oddest businesses the world has ever seen San Francisco Chronicle Just eleven years old Google has profoundly transformed the way we live and work we've all been Googled Esteemed media writer Ken Auletta uses the story of Google's rise to explore the future of media at large This book is based on the most extensive cooperation ever granted a journalist including access to closed door meetings and interviews with industry legends including Google founders Larry Page and Sergey Brin Marc Andreessen and media guru Coach Bill Campbell Auletta's unmatched analysis vivid details and rich anecdotes illuminate how the Google wave grew how it threatens to drown media institutions and where it's taking us next

Dogfight Fred Vogelstein, 2024-03-26 Behind the bitter rivalry between Apple and Google and how it's reshaping the way we think about technology The rise of smartphones and tablets has altered the industry of making computers At the center of this change are Apple and Google two companies whose philosophies leaders and commercial acumen have steamrolled the competition In the age of Android and the iPad these corporations are locked in a feud that will play out not just in the mobile marketplace but in the courts and on screens around the world Fred Vogelstein has reported on this rivalry for more than a decade and has rare access to its major players In *Dogfight* he takes us into the offices and board rooms where company dogma translates into ruthless business behind outsize personalities like Steve Jobs Apple's now lionized CEO and Eric Schmidt Google's executive chairman and inside the deals lawsuits and allegations that mold the way we communicate Apple and Google are poaching each other's employees They bid up the price of each other's acquisitions for spite and they forge alliances with major players like Facebook and Microsoft in pursuit of market dominance *Dogfight* reads like a novel vivid nonfiction with never before heard details This is more than a story about what devices will replace our cell phones and laptops It's about who will control the content on those devices and where that content will come from about the future of media and the Internet in Silicon Valley New York and Hollywood Democratic Empire Jim Cullen, 2016-03-24

DEMOCRATIC EMPIRE **DEMOCRATIC EMPIRE** The United States Since 1945 Democracy and empire often seem like competing even opposing concepts And yet since the end of World War II the United States has integrated elements of both in the process of becoming a dominant global power *Democratic Empire The United States Since 1945* explores the way democracy and empire have converged and been challenged both at home and abroad surveying the nation's recent cultural political and economic history This account pays particular attention to mass media the fine arts and intellectual currents in the era of the American Dream Concise and engagingly written *Democratic Empire* presents a unique analysis of US history since 1945 and the egalitarian and imperial forces that have shaped contemporary America **Information Politics** Tim Jordan, 2015-02-20 Conflict over information has become a central part of modern politics and culture The sites of struggle are numerous the actors beyond count Currents of liberation and exploitation course through the debates about Edward

Snowden and surveillance Anonymous search engines and social media In Information Politics Tim Jordan identifies all these issues in relation to a general understanding of the nature of an information politics that emerged with the rise of mass digital cultures and the internet He locates it within a field of power and rebellion that is populated by many interwoven social and political conflicts including gender class and ecology The exploitations both facilitated by and contested through increases in information flows the embedding of information technologies in daily life and the intersection of network and control protocols are all examined Anyone hoping to get to grips with the rapidly changing terrain of digital culture and conflict should start here New Publication Cultures in the Humanities Péter Dávidházi,2025-10-01 The changes we have seen in recent years in the scholarly publishing world including the growth of digital publishing and changes to the role and strategies of publishers and libraries alike represent the most dramatic paradigm shift in scholarly communications in centuries This volume brings together leading scholars from across the humanities to explore that transformation and consider the challenges and opportunities it brings **Frenemies** Ken Auletta,2019-06-04 An intimate and profound reckoning with the changes buffeting the 2 trillion global advertising and marketing business from the perspective of its most powerful players by the bestselling author of Googled Advertising and marketing touches on every corner of our lives and the industry is the invisible fuel powering almost all media Complain about it though we might without it the world would be a darker place But of all the industries wracked by change in the digital age few have been turned on their heads as dramatically as this one Mad Men are turning into Math Men and women though too few an instinctual art is transforming into a science and we are a long way from the days of Don Draper Frenemies is Ken Auletta s reckoning with an industry under existential assault He enters the rooms of the ad world s most important players meeting the old guard as well as new powers and power brokers investigating their perspectives It s essential reading not simply because of what it reveals about this world but because of the potential consequences the survival of media as we know it depends on the money generated by advertising and marketing revenue that is in peril in the face of technological changes and the fraying trust between the industry s key players On the Map Simon Garfield,2013-11-05 Examines the pivotal relationship between mapping and civilization demonstrating the unique ways that maps relate and realign history and shares engaging cartography stories and map lore International Development Policy Graduate Institute of International and Development Studies,2012-03-06 International development cooperation is undergoing a revolution The authors question how far bilateral and multilateral aid agencies succeed in mainstreaming global issues in their operations and assess how emerging and traditional donors address competing objectives often with diverging rationales Cases include Brazil China and South Africa *China - Opportunities for International Media Businesses: Giving Historical Context, Media Import and Export* Torsten Hoffmann,2012-03-01 The presence of television is influencing the future of China in ways that no other technology or human agency can J Lull Given its importance both culturally and politically the television industry is one of the most interesting industries in China

However a quick review of regulations and market realities showed that there are virtually no foreign channels in the country and probably won't be for a while therefore the focus of this report is foreign television content entering China and to a slightly lesser degree Chinese content in global markets All video genres are discussed here with news and current affairs programming being a special case The first part of this report is a short introduction that includes the history of political influence and a review of existing regulations After this overview the industry and major players namely CCTV Xinhua News Corp Phoenix Disney Discovery Viacom are introduced and analyzed Here the issue of cultural imperialism or Western media influence is elaborated on Then the paper discusses the opportunities for international firms in the Chinese media market and the tension between Government control and market liberalisation A compelling answer to the question of who will dominate the domestic market in ten years is developed Finally the impact of Chinese content on international markets will be assessed within the same timeframe This is particularly interesting as media is not a traditional manufacturing industry and poses different challenges i.e. creative skills
