

Impact Factor Journals Ranking

Donna Farley

Impact Factor Journals Ranking:

Journals of the Century Tony Stankus, 2019-12-06 This book first published in 2002 gathers some of America's top subject expert librarians to determine the most influential journals in their respective fields. 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide. Their choices reflect the history of each discipline or profession taking into account rivalries between universities, professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal's quest for reputational dominance. Each journal was judged using criteria such as longevity of publication, foresight in carving out its niche, ability to attract none are in the employ of any publisher but each is fully credentialed and well published and many are award winners. The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele.

Ranking Péter Érdi, 2020 Ranking of people, schools, products, countries and just about everything else is part of our daily lives. But we are in a paradoxical relationship with ranking: we believe that ranking is good because it is informative and objective and we believe ranking is bad because it is biased and subjective and occasionally even manipulated. **Ranking: The Unwritten Rules of the Social Game We All Play** combines the application of scientific theories to everyday experience with entertaining personal stories.

The Future of the Academic Journal Bill Cope, Angus Phillips, 2014-07-01 The world of the academic journal continues to be one of radical change. A follow-up volume to the first edition of *The Future of the Academic Journal*, this book is a significant contribution to the debates around the future of journals publishing. The book takes an international perspective and looks ahead at how the industry will continue to develop over the next few years. With contributions from leading academics and industry professionals, the book provides a reliable and impartial view of this fast-changing area. The book includes various discussions on the future of journals, including the influence of business models and the growth of journals publishing open access and academic libraries as well as journals published in Asia, Africa and South America. Looks at a fast-moving and vital area for academics and publishers. Contains contributions from leading international figures from universities and publishers.

Neoteric Developments in Management Science in Engineering Jiuping Xu, 2023-04-24 Management science in engineering (MSE) is becoming increasingly important in modern society. In particular, the emergence of efficient and innovative management tools has greatly influenced the progress of management science in engineering research. As research is critical to the dissemination of cutting-edge methods, journal evaluation and classification are essential for scientists, researchers, engineers, practitioners and graduate students. The goal of this book is to identify the major research categories in MSE and to evaluate and classify each MSE journal. This book was compiled through the combined efforts of members of scientific committees, many of whom are editors in chief of the most relevant journals, academics, researchers from different countries and members of professional

societies It will be of interest to scientists researchers practitioners engineers graduate and advanced undergraduate students in the fields of engineering management civil engineering industrial engineering environmental engineering energy engineering information engineering and agricultural engineering
