John Constable - CLOUDS IN PAINTINGS & SKETCHES E. L. Helton PhD, 2021-12-15 Born in East Bergholt Suffolk on 11 June 1776 Constable was the second son of the six children of Golding Constable and Ann Watts He was educated at a private school in Lavenham and at the grammar school in Dedham subsequently joining the family business of which it was intended he would succeed as manager He learned the technique of painting from John Dunthorne a local plumber and glazier who was an amateur painter and was encouraged by Sir George Beaumont Staying with relatives at Edmonton in 1796 he met John Cranch a mediocre artist whose style he imitated and John Thomas Smith the antiquarian draftsman with whom he made drawings of picturesque cottages In 1799 his father gave him an allowance to enter the Royal Academy Schools reluctantly consenting in 1802 to his becoming a professional painter That same year Constable showed his first landscape at the Academy where he was to exhibit nearly every year until his death and acquired a studio opposite the family house He spent summers in East Bergholt sketching from nature until 1817 in the autumn of 1806 he made a two month visit to the Lake District In 1809 Constable met and fell in love with Maria Bicknell but he was unable to marry her until 1816 owing to the opposition of Maria s grandfather After the marriage the couple lived in London first on Keppel Street then after 1822 on Charlotte Street The marriage which was the prelude to Constable s finest work was a deeply happy one and there were seven children to whom the artist was devoted Maria s health was far from robust however and she died in 1828 a blow from which Constable never fully recovered **John Constable's Skies** John E. Thornes, John Constable, 1999-01-01 John Constable is arguably the most accomplished painter of English skies and weather of all time For Constable the sky was the keynote the standard of scale and the chief organ of sentiment in a landscape painting But how far did he understand the workings of the forces of nature which created his favourite cumulus clouds portrayed in so many of his skies over the landscapes of Hampstead Heath Salisbury and Suffolk And were the skies he painted scientifically accurate In this lucid and accessible study John Thornes provides a meteorological framework for reading the skies of landscape art compares Constable s skies to those produced by other artists from the middle ages to the nineteenth century analyses Constable s own meteorological understanding and examines the development of his painted skies In so doing he provides fresh evidence to identify the year of painting of some of Constable s previously undated cloud studies **John Constable's Clouds.**

John Constable and the Fishers R B Beckett, 2023-02-15 First published in 1952 John Constable and the Fishers is based on original letters which have never been published in full before These have been woven into a connected narrative dealing with the friendship which existed between Constable and various members of the Fisher family more particularly the

Bishop of Salisbury a personal friend of George III who entrusted him with the education of Princess Charlotte as heiress to the throne and his nephew the Archdeacon of Berkshire The Archdeacon's letters give a picture of life in a cathedral closed and country vicarages reminiscent of Trollope's Barchester and Thomas Hardy's Wessex In return Constable confides his ideals and ambitions and as Mr Grigson suggests in his introduction the encouragement he received from the Fishers may have had a decisive effect on the future of landscape art The letters are fully annotated and are illustrated with connected works done by Constable This book will of interest to students of history art and literature "Art, Technology and Nature " Camilla Skovbjerg Paldam, 2017-07-05 Since 1900 the connections between art and technology with nature have become increasingly inextricable Through a selection of innovative readings by international scholars this book presents the first investigation of the intersections between art technology and nature in post medieval times Transdisciplinary in approach this volume's 14 essays explore art technology and nature's shifting constellations that are discernible at the micro level and as part of a larger chronological pattern Included are subjects ranging from Renaissance wooden dolls science in the Italian art academies and artisanal epistemologies in the followers of Leonardo to Surrealism and its precursors in Mannerist grotesques and the Wunderkammer eighteenth century plant printing the climate and its artistic presentations from Constable to Olafur Eliasson and the hermeneutics of bioart In their comprehensive introduction editors Camilla Skovbjerg Paldam and Jacob Wamberg trace the Kantian heritage of radically separating art and technology and inserting both at a distance to nature suggesting this was a transient chapter in history Thus they argue the present renegotiation between art technology and nature is reminiscent of the ancient and medieval periods in which art and technology were categorized as aspects of a common area of cultivated products and their methods the Latin ars the Greek techne an area moreover supposed to imitate the creative forces of nature

Clouds Richard Hamblyn, 2017-05-15

Clouds have been objects of delight and fascination throughout human history their fleeting magnificence and endless variety having inspired scientists and daydreamers alike Described by Aristophanes as the patron goddesses of idle men clouds and the ever changing patterns they create have long symbolized the restlessness and unpredictability of nature and yet they are also the source of life giving rains In this book Richard Hamblyn examines clouds in their cultural historic and scientific contexts exploring their prevalence in our skies as well as in our literature art and music As Hamblyn shows clouds function not only as a crucial means of circulating water around the globe but also as a finely tuned thermostat regulating the planet s temperature He discusses the many different kinds of clouds from high scattered cirrus clouds to the plump thought bubbles of cumulus clouds even exploring man made clouds and clouds on other planets He also shows how clouds have featured as meaningful symbols in human culture whether as ominous portents of coming calamities or as ethereal figures giving shape to the heavens whether in Wordsworth s poetry or today s tech speak Comprehensive yet compact cogent and beautifully illustrated this is the ultimate guidebook to those shapeshifters of the sky

John Constable Anthony Bailey, 2012-03-31 Born in 1776 in East Anglia near the river Stour John Constable was destined for his father s business of milling and grain shipping But he was obdurately opposed to this and persuaded his family he should become an artist instead In the same determined spirit he wooed Maria Bicknell in the teeth of opposition from her formidable grandfather and persisted in painting landscapes at a time when history paintings and portraits were the fashion Sometimes sharp and sarcastic and often depressed Constable in fact possessed a warm gift for intimate friendship This is revealed in his letters to John Dunthorne village handyman and housepainter and to his best friend and patron archdeacon John Fisher to whom he wrote I have a kingdom of my own both fertile and populous my landscape and my children In recent times after a period of relative ignominy Constable s influence on British landscape painting has been re acknowledged he has been more widely exhibited and his reputation has been reestablished as one of the masters of his genre This important and absorbing biography explores his life and work and highlights the dramatic tension between the two
