**Background and Introduction to Gattaca**

Gattaca is a 1997 American dystopian science fiction film written and directed by Andrew Niccol in his feature directorial debut. The film presents a future society driven by eugenics where children are conceived through genetic selection to ensure they possess the best hereditary traits of their parents. The film centers on Vincent Freeman, played by Hawke, who was conceived outside the eugenics program and struggles to overcome genetic discrimination as well as his dreams of going into space.

The film draws on concerns over reproductive technologies that facilitate eugenics, and the possible consequences of such technological developments for society. It also explores the idea of destiny and the ways in which it can and does govern lives. Characters in Gattaca continually battle both with society and with themselves to find their place in the world and who they are destined to be according to their genes. The film is noted for its unique use of color. Cinematographer Slavomir Idzak employed vibrant gold, green, and electric blue tones throughout the film, and shot the film in Super 16mm format, which adds an enlarged layer of grain.

The film was shot under the working title *The Eighth Day*, a reference to the seven days of creation in the Bible. However, by the time its release was scheduled for the fall of 1997, the Belgian film *Le huitième jour* had already been released in the US under the title *The Eighth Day*. As a result, the film was retitled *Gattaca*, which takes inspiration from the letters G, A, T, and C, derived from four of the nucleobases of DNA: guanine, adenine, thymine and cytosine. The film tanked at the box office and only earned a domestic total of \$32.3 million against a reported budget of \$34 million. It was a 1997 nominee for the Academy Award for Best Art Direction and the Golden Globe Award for Best Original Score. A follow-up series was in development at Showtime, but has been cancelled as of 2013. Gattaca currently holds an R16 Fresh rating on Rotten Tomatoes with the following critics' consensus: "Intelligent and scientifically provocative, Gattaca is an absorbing sci-fi drama that poses important interesting ethical questions about the nature of science."
