## Introduction

This is the GE NX-8V2-Control Panel installation instructions. Installations should only be done by trained professionals. Use this document to install the system with default settings that comply with UL requirements.

To install the keypad, other peripherals, and sensors, refer to the documentation for those devices.

## Installation

There are four slots for board insertions inside the metal enclosure, two on the top and two on the bottom. These allow the PC board to be positioned vertically (Figure 1). When you slide the board between the grooves of the slots, make sure the terminal strip is toward the front opening (toward you) to allow for the wire connections.

**Note:** Install the metal enclosure with the door opening from the top to bottom.

## Network keypad maximum wire run

Table 1 lists wire lengths for one keypad at the end of the wire. When connecting more than one keypad to the end of the wire, a higher gauge wire is required.

Table 1. Maximum keypad wire run

| Length in feet | Wire gauge for RS-485 | Wire gauge for RS-485-B |
|----------------|-----------------------|-------------------------|
| 250            | 24                    | 23                      |
| 500            | 20                    | 18                      |
| 1000           | 18                    | 16                      |
| 1500           | 16                    | 14                      |
| 2500           | 14                    | 12                      |

## Terminal descriptions

Table 2 describes the panel terminals.

| T1              | House telephone tip (brown)                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| EARTH           | Earth ground. Connect to a cold-water pipe or a 6-to-10 ft. driven rod.                                                                                                                                                                                                                                                                                                                                                                                       |
| AC              | AC input. Connect to a 115 V, 60 or 50 Hz, Class B-15, approved transformer.                                                                                                                                                                                                                                                                                                                                                                                  |
| Bell+ and Bell- | If used as a line-output (default), the speaker rating should be 1.5 watt at 16 ohms or 30 W at 8 ohms. If voltage output is selected in location 1.1, this output becomes voltage output, 1.2 VDC, 1 Amp maximum load. Note: A 1.5 ohm resistor may be required across the bell terminals when a 1.2 VDC alarm is used. If no resistor is used, you may experience voltage feedback into the alarm, which will cause these devices to output a small signal. |
| KP DATA         | Connect to the data terminal on the keypad and the expansion. Maximum number of devices (key pads plus expansion) is 12. See Maximum Wire Run table.                                                                                                                                                                                                                                                                                                          |
| KP COM          | Connect to the common terminal on the keypad and the expansion.                                                                                                                                                                                                                                                                                                                                                                                               |
| KP POS          | Connect to the POS terminal on the keypad and the expansion. Individually, this terminal is limited to 1 amp. Combined this terminal and AUX POSs are limited to 2 amps total current.                                                                                                                                                                                                                                                                        |
| SHORTR          | Smaller detector power (1.2 VDC, 1.5 amps maximum) for those pendant and which allow the integrity zone to be used with smoke detection.                                                                                                                                                                                                                                                                                                                      |
| COM             | Common negative wire of powered devices such as motion detectors and smoke detectors.                                                                                                                                                                                                                                                                                                                                                                         |
| AUX POSV        | Connect positive wire of all powered devices except smoke detectors and keypads. Individually, this terminal is limited to 1 amp. Combined, this terminal and KP POS are limited to 2 amps total current.                                                                                                                                                                                                                                                     |
| ZONE 6          | Connect to one side of zone 6 loop. Connect the other side to com terminal. Open or short as case allows. Only zone 6 may be used for a two-wire smoke detector using a BR-485-DCS resistor. Refer to the wiring diagram for examples. Program location 1.1, segment 8, option 1.                                                                                                                                                                             |
| COM             | Common terminal for zones 7 and 8.                                                                                                                                                                                                                                                                                                                                                                                                                            |
| ZONE 7          | Connect to one side of zone 7 loop. Connect the other side to COM terminal. Open or short as case allows.                                                                                                                                                                                                                                                                                                                                                     |
| ZONE 6 to 1     | Connect as described for zone 7 and 8. Only zone 6 can be a two-wire zone. Refer to the wiring diagram for examples.                                                                                                                                                                                                                                                                                                                                          |
| AUX 1 to AUX 4  | Connect negative lead of low current device (relay, LED indicator, bell resistor in series with LED, etc.) Connect positive lead reference to COM. Current is limited to 50 mA when output is negative and 250 mA when output is positive.                                                                                                                                                                                                                    |
