Posamentier, 2000-07-22 Activities in Geometry is a set of versatile enrichment exercises that covers a very broad range of topics in geometry Euclidean post Euclidean and non Euclidean Several criteria have been used in developing the activities and in selecting the topics that are included All of them bear heavily and equally on our concerns for curriculum goals and classroom management Each activity is presented as a reproducible student investigation It is followed by guidelines and notes for the teacher Each activity is keyed to the National Council of Teachers of Mathematics NCTM Standards Revised This link to the NCTM standards allows teachers to facilitate linking classroom activities to specific state and school district content standards First and foremost the activities are meant to be motivational As much as possible we want this book to achieve the goal of being attractive to students and show them that there is much more to geometry than proving theorems To demonstrate this aspect of geometry it is necessary for the investigation to be quite different from what students encounter in their basal texts different in both substance and form Presenting activities on a regular basis gives the variety and change of pace needed to sustain interest in any subject **Geometry, a Blended Approach** Jay Graening, 1980 Geometry Harold R. Sally, Paul J. Sally (Jr.), 2011 This geometry book is written foremost for future and current middle school teachers but is also designed for elementary and high school teachers The book consists of ten seminars covering in a rigorous way the fundamental topics in school geometry including all of the significant topics in high school geometry The seminars are crafted to clarify and enhance understanding of the subject Concepts in plane and solid geometry are carefully explained and activities that teachers can use in their classrooms are emphasized The book draws on the pictorial nature of geometry since that is what attracts students at every level to the subject The book should give teachers a firm foundation on which to base their instruction in the elementary and middle

grades In addition it should help teachers give their students a solid basis for the geometry that they will study in high school The book is also intended to be a source for problems in geometry for enrichment programs such as Math Circles and Young Scholars Titles in this series are co published with the Mathematical Sciences Research Institute MSRI Publisher s note
