Resources in Education ,1995-04 **Engineering Journal** ,1929 *Cumulated Index Medicus* ,1989 Investing in wet mills and washed coffee in Ethiopia: Benefits and constraints Tamru, Seneshaw,Minten, Bart,2018-08-09

Local value addition in developing countries is often aimed at the upgrading of agricultural value chains since it is assumed that doing so will make farmers better off However transmission of the added value through the value chain and constraints to adoption of value adding activities by farmers are not well understood We look at this issue in the case of coffee in Ethiopia the country s most important export product and value addition in the coffee value chain through washing coffee which is done in wet mills Washed coffee is sold internationally with a significant premium compared to natural coffee and we find that this premium is largely transmitted to producers However while wet mills have become more widespread the share of washed coffee in Ethiopia s coffee exports is not increasing over time and even if coffee farmers have access to a wet mill they often do not sell all their coffee cherries to them Relying on a unique primary large scale dataset and a combination of qualitative and quantitative methods we examine the reasons for this puzzle The reasons seemingly are twofold First labor productivity in producing red cherries which wet mills require is lower than for natural coffee reducing incentives for adoption especially for those farmers with higher opportunity costs of labor Second only impatient often smaller farmers sell red cherries as more patient farmers use the storable dried coffee cherries as a rewarding savings instrument given the negative real deposit rates in formal savings institutions

James Bennett,2019-11-20 Intercollegiate Athletics Inc examines the corrupting influence and damaging financial effects of big time intercollegiate athletics especially football and to a lesser extent basketball on American higher education Including historical and contemporary perspectives the book traces the growth of intercollegiate sports from largely student run activities supervised by faculty to the gargantuan taxpayer supported spectacles that now dominate many public universities It investigates the regressive student fees that have helped subsidize big time sports at public universities and prop up chronically unprofitable athletic departments as well as the corrosive effects of athletics on the university s academic enterprise A review of the alleged salutary effects of massive sports programs such as spurring alumni donations and student applications reveals that such benefits are largely illusory more myth than real The book also pays special attention to the often prescient if largely unsuccessful opponents of these developments and considers the alternatives to big time athletics from abolition to professionalization to club sports Students scholars sports fans and those interested in learning how big time football and basketball have cast such an enormous and often baleful shadow upon American colleges and universities will profit from this provocative and engagingly written book *The Financial Landscape of Emerging Economies* Aswini
