Struggling to Make the Grade: A Review of the Causes and Consequences of the Weak Outcomes of South Africa's Education System Mr.Montfort Mlachila,Tlhalefang Moeletsi,2019-03-01 While South Africa has made significant improvements in basic and tertiary education enrollment the country still suffers from significant challenges in the quality of educational achievement by almost any international metric The paper finds that money is clearly not the main issue since the South Africa's education budget is comparable to OECD countries as a percent of GDP and exceeds that of

most poor sub Saharan African countries in per capita terms The main explanatory factors are complex and multifaceted and are associated with insufficient subject knowledge of some teachers history race language geographic location and socio economic status Low educational achievement contributes to low productivity growth and high levels of poverty unemployment and inequality Drawing on the literature the paper sketches some policy considerations to guide the debate on what works and what does not

López-Torres, 2017-12-29 This Handbook provides a comprehensive overview of the modern economics of education literature bringing together a series of original contributions by globally renowned experts in their fields Covering a wide variety of topics each chapter assesses the most recent research with an emphasis on skills evaluation and data analytics

Privatization in and of Public Education Antonina Santalova, Kaire Pöder, 2024 This book explains how education is becoming more privatized around the world to fit local economic and political needs Privatization in and of Public Education categorizes different types of privatization as traditional or non traditional Traditional policies give more rights to private companies to provide education while non traditional policies make public schools more like businesses The authors show that privatization can lead to more efficient schooling but it can also create a trade off between efficiency and equity or inclusion The book presents a range of perspectives on the impact of privatization including structural ethical and subjective effects The book also covers a range of countries and regions including both developed and developing countries This helps readers understand how privatization is playing out in different contexts around the world

Nationalism and Identity Construction in Central Asia Mariya Y. Omelicheva, 2014-12-17 More than two decades after the break up of the Soviet Union Central Asian republics Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan continue to reexamine and debate whom and what they represent Nationalism and Identity Construction in Central Asia explores the complex and controversial process of identity formation in the region using a 3D framework which stands for Dimensions Dynamics and Directions of nation building The first part of the framework dimensions underscores the new and complex ways in which nationalisms and identities manifest themselves in Central Asia The second part dynamics is premised on the idea that nationalisms and identity construction in the Central Asian republics may indicate some continuities with the past but are more concerned with legitimization of the present power politics in these states It calls for the identification of the main actors strategies tactics interests and reactions to the processes of nationalism and identity construction The third part of the framework directions addresses implications of nationalisms and identity construction in Central Asia for regional and international peace and cooperation Jointly the chapters of the volume address domestic and international level dimensions dynamics and directions of identity formation in Central Asia What unites these works is their shared modern and post modern understanding of nations nationalisms and identities as discursive strategic and tactical formations They are viewed as constructed and imagined and therefore continuously changing but also fragmented and contested

The effect of land inheritance on youth employment and migration decisions: Evidence from rural Ethiopia Kosec, Katrina, Ghebru, Hosaena, Holtemeyer, Brian, Mueller, Valerie, Schmidt, Emily, 2016-12-29 How does the amount of land youth expect to inherit affect their migration and employment decisions This paper explores this question in the context of rural Ethiopia using panel

data from 2010 and 2014 We estimate a household fixed effects model and exploit exogenous variation in the timing of land redistributions to overcome endogenous household decisions about how much land to bequeath to descendants We find that larger expected land inheritances significantly lower the likelihood of long distance permanent migration and of permanent migration to urban areas during this time Inheriting more land is also associated with a significantly higher likelihood of employment in agriculture and a lower likelihood of employment in the nonagricultural sector Conversely the decision to attend school is unaffected These results appear to be most heavily driven by males and by the older half of our youth sample We also find several mediating factors matter Land inheritance plays a much more pronounced role in predicting rural to urban permanent migration and nonagricultural sector employment in areas with less vibrant land markets and in relatively remote areas those far from major urban centers Overall the results suggest that inheritance strongly influences the spatial location and strategic employment decisions of youth

Exploring the Mathematical Education of Teachers Using TEDS-M Data Maria Teresa Tatto, Michael C. Rodriguez, Wendy M. Smith, Mark D. Reckase, Kiril Bankov, 2018-08-16 This book uses the publicly available TEDS M data to answer such questions as How does teacher education contribute to the learning outcomes of future teachers Are there programs that are more successful than others in helping teachers learn to teach mathematics How does the local and national policy environment contribute to teacher education outcomes It invites readers to explore these questions across a large number of international settings The importance of preparing future mathematics teachers has become a priority across many nations Across the globe nations have allocated resources and expertise to this endeavour Yet in spite of the importance accorded to teacher education not much is known about different approaches to preparing knowledgeable teachers and whether these approaches do in fact achieve their purpose The Mathematics Teacher Education and Development Study TEDS M is the first and to date the only cross national study using scientific and representative samples to provide empirical data on the knowledge that future mathematics teachers of primary and secondary school acquire in their teacher education programs The study addresses the central importance of teacher knowledge in learning to teach mathematics by examining variation in the nature and influence of teacher education programs within and across countries The study collected data on teacher education programs structure curriculum and opportunities to learn on teacher educators characteristics and beliefs and on future mathematics teachers individual characteristics beliefs and mathematics and pedagogical knowledge across 17 countries providing a unique opportunity to explore enduring questions in the field

Handbook on the International Political Economy of China Ka Zeng, 2019 This book examines the processes evolution and consequences of China's rapid integration into the global economy Through analyses of Beijing's international economic engagement in areas such as trade investment finance sustainable development and global economic governance it highlights the forces shaping China's increasingly prominent role in the global economic arena Chapters explore China's behavior in global economic governance the interests and motivations underlying China's

international economic initiatives and the influence of politics including both domestic politics and foreign relations on the country's global economic footprint **Proceedings of MAC 2018 in Prague** group of authors, 2018-05-24 The conference proceedings International Academic Conference in Prague 2018 May **Education in Tanzania in the Era of Globalisation** L.P. Lugalla, Marriote Ngwaru, 2019-03-29 Education in Tanzania in the Era of Globalisation Challenges and Opportunities is a product of papers presented at a National Education Conference held in Dodoma Tanzania in November 2016 and organised by the Aga Khan University Institute for Educational Development East Africa AKU IED EA At present Tanzania's development direction is guided by Vision 2025 which aims to achieve a high quality livelihood for its people. The attainment of Vision 2025 will depend largely on rapid socio-economic development based on several social and economic pillars including most importantly education. Clearly for Tanzania the scope and quality of education remains the single most important prerequisite to the attainment of Vision 2025 and the 17 Sustainable Development Goals (SDGs). The individual chapters in this publication and their collective thrust discuss the challenges in the education system in good faith and in the spirit of cooperation and collaboration guided by the belief that it is not the responsibility of the Government alone to see how these can be addressed. AKU IED EA has identified this as the responsibility of all well-meaning corporate bodies and citizens and initiated this conference of its type as its contribution to that conference as well as the publication has to be seen as a model of good practice for universities in terms of sharing knowledge, experience and practice with other stakeholders who are not in the academy and more so with politicians as well as government policy planners. The various authors of Education in Tanzania in the Era of Globalisation Challenges and Opportunities discuss issues within the context of the Tanzanian political economy against the effects of globalization and seek to initiate a new kind of debate that is long overdue: a debate aimed at charting out appropriate strategies whose objective is to improve the quality of education in Tanzania so that it becomes a useful vehicle in enhancing processes of social change, transformation and development.
