Grade12 Life Orientation Written Source Based Task2015:

International Perspectives on Writing Curricula and Development Jill Jeffery, Judy M. Parr, 2021-05-27 This book contributes to the innovation of writing education and research globally by providing crucial insights into how the structures and aims of literacy curricula vary internationally. It examines how nine education systems across five continents represent good writing in curricula that shape students' experiences learning to write in school. The book presents curricular analyses aimed at providing insight into how writing development can be better supported through innovative policy and research. The findings regarding international variation are presented under three broad dimensions: social and contextual factors that shape writing curricula; the discourses of writing reflected in curricula and official documents; and hallmarks of classroom practice including the relationship with official discourse. Case study chapters present integrated inductive and deductive document analyses, findings of which are compared in a concluding cross case analysis chapter. Offering a detailed comparative analysis of writing research, *International Perspectives on Writing Curricula and Development* will be of great interest to academics, researchers, and students in the fields of education, literacy, and curriculum studies. It will also be relevant reading for policymakers and curriculum designers. Chapters 1, 7, 9, 10, and 11 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license.

The Nature of Business Transformation Richard Kelly, 2022-03-17 This book is a practical guide for business professionals to develop and improve business intelligence and collective decision making within their organisation. It proposes a progressive reconfiguration of the traditional business operating system using a nature-inspired framework called swarm facilitation that enables and facilitates collective decision making. Organisations have followed the same rigid formula of problem solving and decision making for over 100 years. It is dominated by centralised governance and pyramid decision making. Such an approach is no longer fit for purpose in an environment of employee disengagement, artificial intelligence, AI, superintelligence, and Covid-19 fallout. By the end of this book, readers will be able to solve organisational problems and challenges collectively using swarm intelligence, upgrade and future-proof business operating systems to reflect a more collective decision making approach fit for the new connected economy, and Industry 4.0 embrace mindset quotients that support people working in a more networked, self-organising, and collective environment. The book is important reading for leaders and managers who are focused on building organisational capital and engagement and gaining value from the emerging technology by evolving their business operating system into a digital ecosystem as part of an ongoing digital transformation strategy. It will also appeal to experts working in the field of organisational change and development, both within the organisation and as consultants.
