

1.1.5 ... tissue functions to conduct impulses throughout the body.

- A connective
- B nerve
- C muscle
- D epithelial

1.1.6 What is the magnification of the eye piece if the total magnification is 40x and the objective lens is 5x?

- A 2x
- B 15x
- C 4x
- D 5x

1.1.7 The following statements refer to the appendicular skeleton:

- i ~~connects arms to the torso~~
- ii ~~connects arms to the pelvis~~
- iii ~~connects arms to the thorax~~
- iv ~~connects the pelvis to the legs~~

Which of the following combinations are correct?

- A ~~ii and iii only~~
- B ~~i and ii only~~
- C ~~i and iii only~~
- D ~~i and iv only~~

1.1.8 How many cells will be present after 4 mitotic divisions?

- A 
- B 
- C 
- D 

1.1.9 Which of the following cells make up phloem tissue?

- A ~~sieve tube elements and companion cells~~
- B ~~sieve tube elements and phloem parenchyma~~
- C ~~sieve tube elements and xylem~~
- D ~~sieve tube elements and collenchyma~~

1.1.10 ... is NOT an adaptation to decrease transpiration.

- A stomatal closure
- B stomatalia
- C stomatal closure during the night
- D ability of a stomata to re-open and close

[10x2=20]

1.2 Give the correct BIOLOGICAL TERM for each of the following statements. Write only the term next to the QUESTION NUMBER (1.2.1-1.2.8).

1.2.1 ~~Organism that feeds on dead organic matter~~

1.2.2 ~~Group of organisms that interact for mutual benefit and are dependent on each other for survival~~

1.2.3 ~~A structure that stores genetic information and is made of DNA~~

1.2.4 ~~Specialised cells that produce and secrete substances such as hormones and enzymes into the blood~~

1.2.5 Site for protein synthesis.

1.2.6 ~~Response that occurs without the need for conscious thought and is automatic~~

1.2.7 Cells containing two sets of chromosomes.

1.2.8 ~~Movement of materials from one part of the body to another part of the body~~

[5x1=5]

1.3 Indicate whether each of the statements in COLUMN I applies to A ONLY, B ONLY, BOTH A and B or NONE of the items in COLUMN II. Write A only, B only, Both A and B or None, next to the QUESTION NUMBER (1.3.1-1.3.3).

	COLUMN I	COLUMN II
1.3.1	Plant organ responsible for transport	Root hairs Stem xylem
1.3.2	Movement of substances from a low concentration to a high concentration	Active transport Diffusion
1.3.3	Test to test for the presence of a reducing sugar	Benedict's solution Biuret's solution

[3x2=6]

1.4 The tables below are those of organic and inorganic compounds.

Complete the TWO tables by writing ONLY the ANSWER next to the QUESTION NUMBER (1.4.1 – 1.4.5) on your folio paper.

Name of compounds	Molecular compound	Importance of compound
Carbon dioxide	1.4.1	Photosynthesis
Hydrogen	1.4.2	Respiration/energy source
1.4.3	Ammonia	1.4.4

Grade1chemistry June 2012 Memo

**Office of the Federal Register (U.S.)
Staff**

Grade1chemistry June 2012 Memo:

Federal Register ,2012-08 **Persistent, Bioaccumulative, and Toxic (PBT) Chemicals** Adam D. K. Abelkop,John D. Graham,Todd V. Royer,2018-10-08 Developed from the efforts of a multiyear international project examining how persistent bioaccumulative and toxic PBT chemicals are evaluated and managed Persistent Bioaccumulative and Toxic PBT Chemicals Technical Aspects Policies and Practices focuses on improving the processes that govern PBTs Incorporating science and policy literature as well as interviews and panel discussions featuring experts from around the world this book provides you with an international perspective of PBT policies centering on Europe Asia and North America and reveals major findings and recommendations for improving PBT science laws and policies It includes case studies of specific chemicals provides an introduction to the overall subject of toxic chemicals and weighs in on science and policy expansion for PBTs It also provides summary tables of important PBTs and discussions on the number of PBTs in commerce weight of evidence approaches market deselection and international management The text Assesses the history current practice and future of PBT management Considers the roles scientific data modeling and conventions play in identifying and regulating PBTs Explores the number of PBTs in commerce and the growing role of weight of evidence WOE in the making of PBT determinations Identifies issues that are likely to come up in WOE judgments Examines international national subnational and regional PBT policies Includes a comprehensive and easy to understand analysis of PBT science and policy This book reviews the current science policies and practices surrounding the regulation of PBTs It also provides relevant research recommendations and suggestions for improving the management and oversight of PBTs Drug Wars Robin Feldman,Evan Frondorf,2017-06-09 While the shockingly high prices of prescription drugs continue to dominate the news the strategies used by pharmaceutical companies to prevent generic competition are poorly understood even by the lawmakers responsible for regulating them In this groundbreaking work Robin Feldman and Evan Frondorf illuminate the inner workings of the pharmaceutical market and show how drug companies twist health policy to achieve goals contrary to the public interest In highly engaging prose they offer specific examples of how generic competition has been stifled for years with costs climbing into the billions and everyday consumers paying the price Drug Wars is a guide to the current landscape a roadmap for reform and a warning of what is to come It should be read by policymakers academics patients and anyone else concerned with the soaring costs of prescription drugs **The Poison Squad** Deborah Blum,2019-09-24 A New York Times Notable Book The inspiration for PBS s AMERICAN EXPERIENCE film The Poison Squad From Pulitzer Prize winner and New York Times bestselling author Deborah Blum the dramatic true story of how food was made safe in the United States and the heroes led by the inimitable Dr Harvey Washington Wiley who fought for change By the end of nineteenth century food was dangerous Lethal even Milk might contain formaldehyde most often used to embalm corpses Decaying meat was preserved with both salicylic acid a pharmaceutical chemical and borax a compound first identified as a cleaning product This was not

by accident food manufacturers had rushed to embrace the rise of industrial chemistry and were knowingly selling harmful products. Unchecked by government regulation, basic safety or even labelling requirements, they put profit before the health of their customers. By some estimates, in New York City alone, thousands of children were killed by embalmed milk every year. Citizens, activists, journalists, scientists, and women's groups began agitating for change. But even as protective measures were enacted in Europe, American corporations blocked even modest regulations. Then in 1883, Dr. Harvey Washington Wiley, a chemistry professor from Purdue University, was named chief chemist of the agriculture department, and the agency began methodically investigating food and drink fraud, even conducting shocking human tests on groups of young men who came to be known as The Poison Squad. Over the next thirty years, a titanic struggle took place with the courageous and fascinating Dr. Wiley campaigning indefatigably for food safety and consumer protection. Together with a gallant cast including the muckraking reporter Upton Sinclair, whose fiction revealed the horrific truth about the Chicago stockyards, Fannie Farmer, then the most famous cookbook author in the country, and Henry J. Heinz, one of the few food producers who actively advocated for pure food, Dr. Wiley changed history. When the landmark 1906 Food and Drug Act was finally passed, it was known across the land as Dr. Wiley's Law. Blum brings to life this timeless and hugely satisfying David and Goliath tale with righteous verve and style, driving home the moral imperative of confronting corporate greed and government corruption with a bracing clarity which speaks resoundingly to the enormous social and political challenges we face today.

Title Announcement Bulletin, 1955

The Schenley Experiment Jake Oresick, 2017-04-14

The Schenley Experiment is the story of Pittsburgh's first public high school, a social incubator in a largely segregated city that was highly even improbably successful throughout its 156-year existence. Established in 1855 as Central High School and reorganized in 1916 as Schenley High School, it was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn, and jazz virtuoso Earl Hines, and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v. Board of Education*, Schenley succumbed to default segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six-day-long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn from a community indelibly tied to the school. A memorable, important work of local and educational history, his book is a case study of desegregation, magnet education, and the changing nature and legacies of America's oldest public schools.

Synthetics,

Mineral Oils, and Bio-Based Lubricants Leslie R. Rudnick, 2020-01-29 Highlighting the major economic and industrial changes in the lubrication industry since the first edition *Synthetics Mineral Oils and Bio Based Lubricants Chemistry and Technology Third Edition* highlights the major economic and industrial changes in the lubrication industry and outlines the state of the art in each major lubricant application area Chapters cover the use of lubricant fluids growth or decline of market areas and applications potential new applications production capacities and regulatory issues including biodegradability toxicity and food production equipment lubrication The highly anticipated third edition features new and updated chapters including those on automatic and continuously variable transmission fluids fluids for food grade applications oil soluble polyalkylene glycols functional bio based lubricant base stocks farnesene derived polyolefins estolides bio based lubricants from soybean oil and trends in construction equipment lubrication Features include Contains an index of terms acronyms and analytical testing methods Presents the latest conventions for describing upgraded mineral oil base fluids Considers all the major lubrication areas engine oils industrial lubricants food grade applications greases and space age applications Includes individual chapters on lubricant applications such as environmentally friendly disk drive and magnetizable fluids for major market areas around the globe In a single unique volume *Synthetics Mineral Oils and Bio Based Lubricants Chemistry and Technology Third Edition* offers property and performance information of fluids theoretical and practical background to their current applications and strong indicators for global market trends that will influence the industry for years to come
