*House of Commons - Environmental Audit Office: Progress on Carbon Budgets - HC 60* Great Britain: Parliament: House of Commons: Environmental Audit Committee,2013-10-08 The UK's existing carbon budgets represent the minimum level of emissions reduction required to avoid a global 2 degrees temperature rise regarded as a dangerous threshold and the UK's leading climate scientists do not believe loosening the budgets is warranted The current 2008 2012 and second 2013 2017 carbon budgets will be easily met because of the recession But the UK is not on track to meet the third 2018 22 and fourth budgets 2023 2027 because not enough progress is being made in decarbonising transport buildings and heat production The Government's Carbon Plan which set milestones for five key Government Departments to cut carbon is out of date without any quarterly progress reports published yet The Green Deal has also had low take up rates so far The Government should set a 2030 decarbonisation target for the power sector now rather than in 2016 as the Energy Bill sets out The Government should also reconsider placing a statutory duty on local authorities to produce low carbon plans for their area The current low carbon price in the EU ETS the result of the economic downturn of recent years and over allocation of emissions permits also means that that scheme will not deliver the emissions reductions envisaged when the fourth carbon budget was set Without any tightening of the EU ETS increased pressure will therefore be placed on the non traded sector which will have to produce further emissions reductions to cover the emerging gap left by the traded sector

**Conventional Military Strategy in the Third Nuclear Age** Joy Mitra, 2023-02-28 This volume delves into the way conventional deterrence operates between nuclear armed states in the third nuclear age Unlike the first and second ages the advent of this new age has witnessed greater strain on the principles of mutual vulnerability and survivability that may result in increased risks of advertent or inadvertent escalation and horizontal nuclear proliferation The book looks at the sum of three key simultaneous developments in the third nuclear age that merit attention These include the emergence of asymmetric strategies the

introduction of unmanned platforms and the expansion of nuclear arsenals The volume discusses how these concurrent developments might shape the practice of conventional deterrence and provides useful insights into conventional military dynamics not just among the current nuclear dyads but also ones that may emerge in future It seeks answers to several key issues in state security not limited to What purpose and scope does the conventional military instrument have in a state s overall military strategy versus other nuclear armed states If mutual vulnerability and deterrence are the frameworks why did the prospect of escalation appear in the first place What are the trends political doctrinal or technological that augment or diminish conventional and nuclear interface With insights on military crises that have witnessed participation from nuclear armed states like the United States Russia China Pakistan and India this book will especially be of interest to scholars and researchers working in the areas of security and deterrence studies defence and strategic studies peace and conflict studies and foreign policy It will also appeal to policymakers career bureaucrats security and defense practitioners and professionals working with think tanks and embassies
