

## Anderic® RRTX012 Operating Instructions

### WALL BRACKET INSTALLATION

The included wall bracket can be installed to house the remote control. Remove the small plate preassembled on the wall bracket and use the screws provided to secure the wall bracket at desired mounting location. Replace the small plate.

### SETTING UP THE REMOTE CONTROL

The receiver should already be installed from the factory. Receiver assembly is not needed.

1. **Installing the Battery**  
Remove the battery cover from the back of the remote. Insert an "A23 12V" battery (not included); ensuring the polarity matches with diagram indicated in the battery compartment. Replace battery cover.
2. **Learning/Pairing the remote control (see Figure 1)**  
The dip switch in the remote control has been set to "0" to match the receiver in the fan. If there is more than one fan that uses this same remote control, changing dip switch setting may be needed.

To change the dip switch setting, slide the switch inside the battery compartment to "1", turn off power to the fan, then turn on the power. Within 30 seconds of restoring power, tap the "learn" key located inside battery compartment. If learning is successful, the fan light will blink three times and turn on.

Note: The fan will run at the highest speed in corresponding direction per seasonal slide switch.

### OPERATING THE REMOTE CONTROL

#### 1. Season slide switch (see Figure 2)

- Slide the switch depending on the direction you wish the air to flow.  
Note: Wait for the fan to stop before reversing switch.
- In warmer weather, counterclockwise rotation creates a downward air flow, which cools the air. Slide switch to the left indicated by the SUN icon.
- In cooler weather, clockwise rotation creates an upward air flow, which moves hot air from the ceiling into the room. Slide the switch right indicated by the SNOWFLAKE icon.
