Robertson, Mattan Schuchman, 2024-11-25 Older adults are living longer with more chronic disease and functional impairment than at any other time in history Office based practice is inadequate to meet the needs of patients who have difficulty leaving their homes for routine or urgent visits and health care clinicians must choose between trying to manage their problems via telehealth or sending them to the emergency room via ambulance Indeed many clinicians receive little or no training in home based medical care and are unable to consider a home visit that might avert a health crisis or an emergency room visit Other clinicians know that house calls are possible but may not know how to work them into day to day practice In recent years a growing number of clinicians have focused their practice on home based medical care to meet the rising need In fact there has been a substantial increase in house calls provided to Medicare beneficiaries In 2023 over 750 000 traditional Medicare beneficiaries and in 2022 over 680 000 Medicare Advantage beneficiaries received longitudinal home based medical care While the number of house calls has increased rapidly the number of clinicians providing those visits has markedly decreased suggesting that clinicians who are providing such care are making it the sole focus of their practice This book is intended to be a practical reference for any clinician who has struggled to care for an older adult who has difficulty getting to the office By describing fundamental principles of geriatric house call medicine and application to specific diseases and conditions we hope to provide clinicians with the tools they need to provide timely compassionate and high quality care for their older adult patients The second edition has been updated to reflect changes in the healthcare system and approaches to care since the publication of the first edition      **Catalog of Federal Domestic Assistance** ,2008 Identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs      *Health, United States* ,2009      Health, United States Office of Public Health and Science, Health and Human Services Department, 2015-05-20 This is the 37th annual report prepared for the Secretary of the Department of Health and Human Services by the Centers for Disease Control and Prevention's National Center for Health Statistics The report includes a compilation of health data from state and federal health agencies and the private sector Health United States 2013 features 135 tables on key health measures through 2012 from a number of sources within the federal government and in the private sector The tables cover a range of topics including birth rates and reproductive health life expectancy and leading causes of death health risk behaviors health care utilization and insurance coverage and health expenditures The Health United States series presents an annual overview of national trends in health statistics The report contains a Chartbook that assesses the nation's health by presenting trends and current information on selected measures of morbidity mortality health care utilization and access health risk factors prevention health insurance and personal health care expenditures This year's Chartbook includes a Special Feature on Prescription Drugs that contains an array of statistics The report also contains 135 Trend Tables organized around four major
