

### Café/Visitor centre construction and materials

The client has specified that visitor centre/café be constructed to the following criteria:

- Minimum plan dimensions of 12m x 8m
- Masonry structure

To ensure that the visitor centre/café is in keeping with the rest of the project several factors will be considered:

- Materials used are eco friendly and sustainable
- Structure blends in with surrounding landscape
- Construction methods mitigate possibility of contamination to ground or watercourse

### Materials

Roof – Several options for roofs can be considered slates, tiles, felt etc. but in modern construction several new technologies for eco friendly roof coverings have been developed, tried and tested. The main 2 that stand out are:

- Green roofs - they are basically the use of vegetation as a roof covering to retain or delay storm water run off easing the pressure on drains, they also provide a habitat for birds and insects, also there appearance is pleasing on the eye especially in urban areas where a lack of greenery is becoming an ever increasing issue. Also green roofs are renowned for they're thermal properties further reducing the pollution caused by burning fossil fuels to heat less energy efficient projects.
- Recycled metal roof coverings these are normally made from aluminum or steel and provide a much more durable roof covering in comparison with felt or tiles and even after the lifespan of the building has passed a recycled metal roof covering can be reused on future projects further improving the green credentials of this roof covering.

As the main aim of this project is to provide the most environmentally friendly materials whilst retaining the natural look of the surrounding landscape, means that the green roof is the material of choice, this was mainly due to the fact that as this was a country park project and the materials being used had to tie in with the rest of the theme the use of vegetation on the roof would further compliment the surrounding landscape in comparison with the recycled metal roof as the surface texture, color etc. would not be in keeping with the natural feel of the project.

Green roof will be installed by experienced contractors such as Icopal. The main problems that arise from green roofs are improper waterproofing of the roof
