Before comparing within- and between-group differences, we first examined the overall pattern of groupings together on the basis of the place or space from the students' self-reported drawings. In order to identify the groupings, we compared each page from the 12 students' self-reported drawings to the 12 drawings. We identified that there were two main groupings: one that had a person and a place, and another that had a person and a place, and a person and a place. The groupings were as follows: (1) person and place, (2) person and place, (3) person and place, (4) person and place, (5) person and place, (6) person and place, (7) person and place, (8) person and place, (9) person and place, (10) person and place, (11) person and place, (12) person and place.
