Women in Formal and Informal Education ,2023-05-01 Understanding the processes related to gender construction requires a multi and interdisciplinary approach Complexity emerges as a category of investigation and an end to be pursued giving space to a plurality of voices interpretations and points of view With such intellectual curiosity the volume s authors questioned the inclusion and exclusion of these multiple voices in education How has teaching on gender made room for this complexity What views were included Which ones were overlooked What have educational models for children been privileged in the imagination Which histories and stories have accompanied them in acquiring an awareness linked to gender Through such important questions and many more the volume highlights the gender changes that took place from mid eighteen century to today in various contexts relating to formal and informal education through an international comparative perspective The multiplicity of approaches methodologies and perspectives allows us to read and analyze these changes in a composite way underlining little known aspects of gender studies in the historical educational field The Political Space of Art Benoît Dillet,Tara Puri,2016-05-18 This book studies the tension between arts and politics in four contemporary artists

from different countries working with different media The film directors Luc and Jean Pierre Dardenne film parts of their natal city to refer to specific political problems in interpersonal relations The novelist Arundhati Roy uses her poetic language to make room for people s desires her fiction is utterly political and her political essays make place for the role of narratives and poetic language Ai Weiwei uses references to Chinese history to give consistency to its economic miracle Finally Burial s electronic music is firmly rooted in a living breathing London built to create a sound that is entirely new and yet hauntingly familiar These artists create in their own way a space for politics in their works and their oeuvre but their singularity comes together as a desire to reconstruct the political space within art from its ruins These ruins were brought by the disenchantment of 1970s the end of art postmodernism and the rise of design marketing and communication Each artwork bears the mark of the resistance against the depoliticisation of society and the arts at once rejecting cynicism and idealism referring to themes and political concepts that are larger than their own domain This book focuses on these productive tensions
