Bharath Sriraman, Jinfa Cai, Kyeonghwa Lee, Lianghuo Fan, Yoshinori Shimizu, Chap Sam Lim, K. Subramaniam, 2015-08-01 Mathematics and Science education have both grown in fertile directions in different geographic regions. Yet the mainstream discourse in international handbooks does not lend voice to developments in cognition, curriculum, teacher development, assessment policy, and implementation of mathematics and science in many countries. Paradoxically, in spite of advances in information technology and the flat earth syndrome, old distinctions and biases between different groups of researchers persist. In addition, limited accessibility to conferences and journals also contribute to this problem. The International Sourcebooks in Mathematics and Science Education focus on under-represented regions of the world and provide a platform for researchers to showcase their research and development in areas within mathematics and science education. The First Sourcebook on Asian Research in Mathematics Education (China, Korea, Singapore, Japan, Malaysia, and India) provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world. The book is organized in sections coordinated by leaders in mathematics education in these countries and

editorial teams for each country affiliated with them The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe North America and other countries in addition to serving as a platform to showcase existing research that has shaped teacher education curricula and policy in these Asian countries The book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside Asia and complement the Nordic and NCTM perspectives The Effective Teaching of Mathematics Malcolm Simmons,2014-09-11 First published in 1993 This series has been written for trainee teachers wishing to improve their teaching skills as well as for in service teachers especially those engaged in the supervision of trainees The book provides an overview of mathematics teaching at secondary level and links established mathematics content to recent curriculum developments in mathematics teaching in England and Wales and in Scotland The main purpose of the book is to instigate and complement good mathematics teaching practice in our classrooms Mathematics and Science for Students with Special Needs Eisenhower National Clearinghouse for Mathematics and Science Education,2003 *Teaching and Learning of mathematics* Noraini Idris,2005 *Secondary Education Journal* ,1980 Resources in Education ,1981 *The Australian Mathematics Teacher* ,1981 *School Library Journal* ,1997 *The Education Index* ,1991 **Glencoe Mathematics** ,2001 The Software Catalog MENU Staff,Menu,1987 **Current Index to Journals in Education** ,1990
