Trust-Based Observations Craig Randall,2020-07-30 The results are in observations are not improving teaching and learning Pertinently the Gates Foundation s recently completed effort to improve student outcomes through enhancing the teacher evaluation process failed to achieve substantive improvement The way observations are currently designed serve as an obstacle to teacher risk taking Teachers fear negative evaluations when their pedagogy is rated and they lack faith in being supported by supervisors because a trusting relationship between them and their observer has not been built Trust Based Observations Maximizing Teaching and Learning Growth is a schema changing evaluation model that understands people perform at their best when they feel safe and supported It begins with twelve 20 minute observations per week followed by collegial conversations driven by reflective questions sharing observed teaching strengths and the building of safe and trusting relationships with teachers Add the elimination of rating pedagogical skills and replace it with rating mindset and teachers trust When teachers fully embrace risk taking and innovation it leads to remarkable teaching transformations and improved student learning

The Social Psychology of Sport Gordon W.

Russell,2012-12-06 This book is written from the perspective of a social psychologist As a consequence the topics covered in the upcoming chapters were chosen from among those traditionally of interest to the discipline of social psychology A criterion for inclusion was the topic s usefulness in providing insights and or understanding of the social processes at work in sports settings To this end I have drawn extensively from mainstream journals in social psychology e g Journal of Personality and Social Psychology and grounded the discussion of topics and issues on the methodologically sound studies experiments they generally provide There is also an equally strong interdisciplinary emphasis that features research from physical education sociology management science and education I have made a further attempt not as successful as I would have liked to incorporate a substantial amount of the fine sports research that has been conducted overseas particularly in Europe and Australia I am hopeful that in bringing together the works of international scholars from a variety of disciplines a clearer and balanced outline of this field will take shape And now a word about the audience for this text and how to get the most from its pages I would suggest that the reader have taken a course in social psychology following an introductory level course An introductory course in research methodology would also be helpful
