can continually invest in themselves and the market Through an analysis of consumer financial literacy education's present and historical supports as well as its likely effects this book argues that the choice before us is not financial illiteracy or financial literacy Rather the choice is between subjugation to the requirements of perpetual competition or overcoming alienation insecurity and exploitation aims the critical financial literacy education outlined at the end of this book supports This book will appeal to those interested in understanding the conditions of our freedom in an increasingly financialized world critical educators philosophers and sociologists of education and financial literacy researchers
