datasets and including case studies from Australia Cambodia China Malaysia India and Japan the authors focus on shedding light on the efficacy of institutional policies and reforms The worldwide Gross Enrolment Ratio GER in higher education neared 40 per cent in 2020 due to the dramatic increase in enrolments in many developing economies especially in Asia This significant increase in the number of students in higher education brings great benefits but requires major ongoing investment by governments around the world This growth has followed waves of internationalization and marketization and universities are undergoing substantial change in their organization and character The goal of many institutional policies and reforms has been better performance and higher productivity Yet little is known about whether they have achieved this aim Students government officials and university leaders all have the right to ask whether the outcomes of higher education justify the costs of running the system Although increasing attention has been paid to higher education institutions management and operation the study of higher education performance and productivity is still in its relative infancy compared to other enterprises Written for students and scholars interested in higher education management and productivity this book will also appeal to government officials and university leaders keen to know more about institutional reform and how to achieve better performance
