The second largest economy in Latin America Mexico seems poised to enter a new growth phase as the government of Enrique Pe a Nieto implements radical changes in a number of sectors across the economy The reforms aimed at raising the competitiveness of the Mexican economy have the

potential to establish Mexico's position as a regional powerhouse Optimism surrounding the recent wave of reforms coupled with a stable macroeconomic environment and an improved credit rating from international agencies has placed Mexico centre stage Despite slower than anticipated growth of 1.1% in 2013 a wave of reforms affecting a range of sectors is expected to bring a new dynamism to the economy and continue to attract increasing amounts of foreign investment A highly anticipated energy reform approved by Congress in 2013 will for the first time in decades open the nationalised oil industry to foreign investment while a new public private partnership law is set to provide the climate of legal certainty needed to attract private investment in the myriad of sectors undergoing expansion While challenges remain in particular informality and deficient domestic supply chains growth prospects remain positive for the second largest economy in Latin America

book aims to develop research informed insights into the nature of the pronunciation challenges facing beginner learners of Chinese While existing research has shown that producing native like tones is difficult for Anglophone learners the question of how important tones are for intelligibility has been largely ignored Do heavily accented tones actually matter Which specific areas of the learners speech signal mislead their listeners How aware are learners of their own pronunciation errors Teachers of Chinese may not be able to solve entrenched geopolitical tensions but we can lay the foundations for a stronger engagement with China through excellent teaching However before authoritative pedagogical interventions can be made far more understanding is required of not only how adolescent beginners learn Chinese in school settings but also what can be realistically expected of them
