Bibliography of Scientific and Industrial Reports ,1947 **Index of Specifications and Standards** ,1988 Managing Salinization Waltina Scheumann,2012-12-06 Salinization of soils is a major threat to irrigated agriculture and counteracts the targets of costly public infrastructure investments In this study salinization is regarded as the outcome of an institutional arrangement which impedes the effective implementation of well known and well established control measures be they technical managerial or economic In public irrigation systems neither the management units nor the farmers are offered any incentives towards the control of high groundwater levels and salinization if the management units are embedded in a highly centralized non market institutional setting The author answers the question under which conditions management units and irrigators are active in halting and reversing the process of salinization
