Understanding Human Development Ursula M. Staudinger, Ulman E.R.

Lindenberger, 2012-12-06 K Warner Schaie I am pleased to write a foreword for this interesting volume particularly as over many years I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague mentor or research collaborator The editors begin their introduction by asking why one would want to read yet another book on human development They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so essential to understanding development This volume provides a positive remedy to past deficiencies in volumes on human development with a well organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure This approach does not surprise After all the editors and most of the contributors at one time or another had a connection to the Max Planck Institute of Human Development in Berlin whether as students junior scientists or senior visitors That institute under the leadership of Paul Baltes has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality Over the past two decades it has influenced the careers of a generation of scientists who have advocated long term studies of human development in an interdisciplinary context

Joshi, 2024-01-29 Stories of humans striving for the good life are the focus of this new text from Roni Kay M O Dell and Devin K Joshi grounding students understanding of globalization and international development in real human and practical experience Globalization and Human Development provides a new history and focus to the study of international development with a concern for how people have been included or continue to be left out of the center of development thinking and practice While many books on international relations ignore the contributions and influence of the Global South this book incorporates their important contributions while at the same time recognizing the continued inequalities and disproportionate power and wealth of these marginalized nations This book is the first to examine the globalization of the human development and capability approach HDCA as an ideology of international development and an ideology of globalization It explores the relationship between HDCA and globalization and the extent to which the HDCA has been globalizing Further the authors analysis looks at How certain HDCA ideas are promoted discussed and cited more often than those stemming from neoliberalism and other development paradigms How the HDCA was influenced by development thinking in the Global South during the Cold War along with mobilizations to end all forms of colonialism neocolonialism and imperialism Why the HDCA has re oriented global development thinking and practice away from state centric and profit focused development models fixated on GDP growth to prioritize individual well being and freedoms
